Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services.

In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

Frank Bros was at the forefront of modern furniture sales in the United States during the middle of the twentieth century, serving as the primary retailer for some of the most recognisable names in mid-century design including Alvar Aalto, Charles and Ray

Eames, Van Keppel Green and Bruno Matthsson, amongst many others. As the interior designers for over half of the Case Study Houses, Frank Bros helped define a branch of modernism unique to Southern California. This unique publication documents the history of a store that changed the way Americans responded to their domestic environment. Using pioneering methodologies and practices such as in-house exhibitions, eye-catching graphic design and a specialised sales force, Frank Bros not only promoted a re-envisioned post-war lifestyle, but also educated the public on the precepts of good design. Covering the entire history of the store, as well as its lasting legacy, Frank Bros: The Store That Modernized Modern comprises archival material, ephemera, essays and interviews providing a rich complexion of the influence that one store in Long Beach had across an entire country. Published in partnership with University Art Museum.
