As the chief planner for General Marshall, and co-author of the Victory Plan, General Wedemeyer had a truly significant hand in shaping and directing the Allied War effort against the Fascist powers. In these brilliant, excellently written memoirs he reveals the planning and execution of Grand Strategy on a global scale that toppled Hitler, Mussolini and Tojo. ““The Second World War,” says historian Walter Millis, “was administered.”...As a war planner in Washington from 1940 into 1943 I was intimately involved in an attempt to see the war whole—and even after I had moved on to Asia, where I served successively on Lord Louis Mountbatten’s staff in India and as U.S. commander in the China Theater, I was still close to the problems of adapting Grand Strategy to a conflict of global dimensions. It was inevitable, then, that the subject of Grand Strategy should predominate in this book. I was not deprived of my own share of war experience from close up, but my most strenuous battles were those of the mind—of trying, as we in Washington’s planning echelons saw it, to establish a correct and meaningful Grand Strategy which would have resulted in a fruitful peace and a decent post-war world. There were many obstacles in the way of developing a meaningful strategy, of assuring that our abundant means, material and spiritual, would be used to achieve worthy human ends. First, there was the pervasive influence of the Communists, who had their own plans for utilizing the war as a springboard to world domination. Second, there was the obstinacy of that grand old

man, Winston Churchill, who, as we soldiers felt, could never reconcile his own concepts of Grand Strategy with sound military decisions. Because we had to contend with the machinations of Stalin on the one hand and with the bulldog tenacity of Churchill on the other, this book has had to be harsh in some of its personal assessments.”-Foreword

Vajrayogini is a tantric goddess from the highest class of Buddhist tantras who manifests the ultimate development of wisdom and compassion. Her practice is prevalent today among practitioners of Tibetan Buddhism. This ground-breaking book delves into the origins of Vajrayogini, charting her evolution in India and examining her roots in the Cakrasamvara tantra and in Indian tradition relating to siva. The focus of this work is the Guhyasamayasadhanamala, a collection of forty-six sadhanas, or practice texts. Written on palm leaves in Sanskrit and preserved since the twelfth century, this diverse collection, composed by various authors, reveals a multitude of forms of the goddess, each of which is described and illustrated here. One of the sadhanas, the Vajravarahi Sadhana by Umapatideva, depicts Vajrayogini at the center of a mandala of thirty-seven different goddesses, and is here presented in full translation alongside a Sanskrit edition. Elizabeth English provides extensive explanation and annotation of this representative text. Sixteen pages of stunning color plates not only enhance the study but bring the goddess to life.
History of the Old Covenant Simon and Schuster De proprietatibus rerum, ‘ On the properties of things ’ , has long been referred to by scholars as a medieval encyclopedia, but evidence suggests that it has been many things to many people. The sheer number of extant manuscript copies and printed editions, along with translations, adaptations, and mentions in poems and sermons, testify to its continuous significance for Europeans of all estates and different walks of life, from the thirteenth to the seventeenth centuries. While first compiled soon after the time of St Francis by a humble continental friar to meet the needs of his expanding religious brotherhood, by 1600 English men of letters had claimed Bartholomew as a noble compatriot and national treasure. What was it about the work that propelled it through a progression of medieval

cultures and into an exalted position in the world of English letters? This reception history traces evidence for the journey of ‘ Properties ’ over four centuries of social, political and religious change.

The year was 1928 when two young Hungarians decided to travel around the world on a Harley-Davidson motorcycle with sidecar. Like Robert Fulton, whose circumnavigation of the globe is chronicled in his popular 1937 book One Man Caravan, Sulkowsky thought his was the first around-the-world journey on a motorcycle. This account of his trip with friend Gyula Bartha gives a very clear-eyed view of the world in the 1930s -- a world where the colonizing influence of Europe had affected much of Africa and Asia but not all. The two experienced the riches of sultans, witnessed remote cultures and extreme poverty in far-flung villages, travelled through wilderness with the ever-present danger of wild animals, and traversed roads of all descriptions. They dealt with mud, sand, extreme heat and cold, and rivers where the motorcycle had to be taken apart to cross in a small boat. This intelligent and engaging book, now in a paperback edition, offers a unique world view between the World Wars, flavored by the great diversity of cultures and the wide variety of human life that exists on the planet.

This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their

paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, The Victory Motorcycle.

The ability of the American air forces to wage war independently and to carry the battle to the enemy's heartland has played a critical role in American air doctrine and military strategy since the 1930s. Generals LeMay, Johnson, Burchinal, and Catton explain their roles in flying and commanding bombing missions and campaigns during World War II, in creating the atomic force in the immediate postwar years, and in building the Strategic Air Command in the 1950s. The Cuban Missile Crisis and the Vietnam War are also discussed.
