Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Get an inside look at the real beginning of outlaw biker culture with this " raucous and heartfelt recounting of the early days of biker clubs " (Roadbike). The story starts one weekend in 1947, at a motorcycle race in Hollister, California. A few members of one club, the no-holds-barred

" Boozefighters, " got a little juiced up and took their racing to the street. Word of the fracas spread, and soon enough Life magazine was on hand to tell the world, with sensational (albeit posed) pictures of the outlaws. And then the " Hollister riot " made its way into the movies, immortalized in Marlon Brando ' s " The Wild One. "

What was the reality behind the myth? Through interviews with the surviving members of the Boozefighters, current member Bill Hayes and club historian Jim " JQ " Quattlebaum take readers right into the fray for a firsthand account of what happened in Hollister, and the formation of the Boozefighters, where the outlaw biker culture truly began. The book, " with its great stories and entertaining real-life characters " (MotorcycleUSA.com), is " mandatory reading for anyone interested in American motorcycling history " (Minnesota Motorcycle Monthly).

Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed

rotor were obtained. Hassan, A. A. and Charles, B. D. and Tadghighi, H. and Sankar, L. N. Unspecified Center NASA-CR-4426, NAS 1.26:4426 NAS1-19136; RTOP 505-63-36... Yamaha 650 Twins Owners Workshop Manual VelocePress

James's notion of sciousness or 'pure experience' is akin to Zen tathata (suchness). Japan's renowned philosopher Kitaro Nishida, in fact, used James's concept to explain tathata to the Japanese themselves. As this collection of essays makes clear, Western practioners of Zen and other nondual practices need not be spiritual vagabonds. We need, rather, to claim our inheritance from the 'father of American psychology.'
