Learn how to use R to turn raw data into insight, knowledge, and understanding. This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience, R for Data Science is designed to get you doing data science as quickly as possible. Authors Hadley Wickham and Garrett Grolemund guide you through the steps of importing, wrangling, exploring, and modeling your data and communicating the results. You'll get a complete, big-picture understanding of the data science cycle, along with basic tools you need to manage the details. Each section of the book is paired with exercises to help you practice what you've learned along the way. You'll learn how to: Wrangle—transform your datasets into a form convenient for analysis Program—learn powerful R tools for solving data problems with greater clarity and ease Explore—examine your data, generate hypotheses, and quickly test them Model—provide a low-dimensional summary that captures true "signals" in your dataset Communicate—learn R Markdown for integrating prose, code, and results

In this second edition of Arabic Sociolinguistics, Reem Bassiouney expands the discussion of major theoretical approaches since the publication of the book ' s first edition to account for new sociolinguistic theories in Arabic contexts with up-to-date examples, data, and approaches. The second edition features revised sections on diglossia, code-switching, gender discourse, language variation, and language policy in the region while adding a chapter on critical sociolinguistics—a new framework for critiquing the scholarly practices of sociolinguistics. Bassiouney also examines the impact of politics and new media on Arabic language. Arabic Sociolinguistics continues to be a uniquely valuable resource for understanding the theoretical framework of the language.

Between 1997 and 2014, Tom Kristensen won the world's toughest motor race, the Le Mans 24 Hours, a record nine times and finished on the podium on five more occasions. Every time his car made it to the finish, in fact, he was in the top three. It is no wonder that this great sports car driver is known as 'Mr Le Mans' to motorsport fans around the world. Now retired from racing, Kristensen shares in this book his deepest personal reflections and insights from inside and outside the cockpit. He looks back on more than 30 years spent striving for perfection in racing and tells of the battles and setbacks that sometimes seemed impossible to overcome, including a terrible accident in 2007. Climbing the racing ladder, from karting into Formula 3 single-seaters, including championship titles in Germany (1991) and Japan (1993), then Formula 3000 and a Formula 1 testing role with Tyrrell. Winning as an underdog on his first visit to Le Mans, in 1997 driving an elderly Joest-run privateer Porsche in which he impressed all onlookers with a night-time charge to vanquish Porsche's factory-entered favourite. His second Le Mans victory came in 2000 on his maiden drive for Audi in the R8, a car that was to become all-conquering. Kristensen won the next five editions of Le Mans, four times with Audi and once with Bentley (in 2003), his last victory in this sequence taking him past Jacky Ickx's previous record at the Circuit de la Sarthe. His eighth win came in one of the all-time classic contests at Le Mans, in 2008, a rollercoaster of a race in which his ageing diesel-powered Audi was never expected to beat the fancied works Peugeots. One more victory with Audi in 2013 sealed his reputation as a true legend of Le Mans. His story includes exploits at other racetracks all over the world, none more prolific than Sebring, home of America's long-established classic endurance race that Kristensen won six times. Personal reflections together with contributions from notable observers -- including English journalists Gary Watkins and Charles Bradley -- complete a truly rounded portrait of the man and his achievements. Voted 'Sports Book of the Year' when originally published in Kristensen's native Denmark, this thoughtful memoir is now available in English.

The Feed Zone Cookbook offers 150 athlete-friendly recipes that are simple, delicious, and easy to prepare. When Dr. Allen Lim left the lab to work with pro cyclists, he found a peloton weary of food. For years the sport's elite athletes had been underperforming on bland fare and processed bars and gels. Science held few easy answers for nutrition in the real world, where hungry athletes must buy ingredients; make meals; and enjoy eating before, during, and after each workout, day after day. So Lim set out to make eating delicious and practical. His journey began with his mom, took him inside the kitchens of the Tour de France, and delivered him to a dinner party where he met celebrated chef Biju Thomas. Chef Biju and Dr. Lim vetted countless meals with the world’s best endurance athletes in the most demanding test kitchens. In The Feed Zone Cookbook: Fast and Flavorful Food for Athletes, Thomas and Lim share their energy-packed, wholesome recipes to make meals easy to prepare, delicious to eat, and better for performance. The Feed Zone Cookbook provides 150 delicious recipes that even the busiest athletes can prepare in less time than it takes to warm up for a workout. With simple recipes requiring just a handful of ingredients, Biju and Allen show how easy it is for athletes to prepare their own food, whether at home or on the go. The Feed Zone Cookbook strikes the perfect balance between science and practice so that athletes will change the way they think about food, replacing highly processed food substitutes with real, nourishing foods that will satisfy every athlete’s cravings. The Feed Zone Cookbook includes 150 delicious recipes illustrated with full-color photographs Breakfasts, lunches, recovery meals, dinners, snacks, desserts Dr. Allen Lim's take on the science and practice of food Portable real food snacks, including Lim’s famous rice cakes Dozens of quick-prep meals for before and after workouts Shortcuts, substitutions, and techniques to save time in the kitchen Over 100 gluten-free and vegetarian alternatives to favorite dishes

Electromagnetic Compatibility of Electric Vehicle Evro Publishing Limited
The Autonomous Vehicle (AV) has been strongly heralded as the most exciting innovation in automobility for decades. Autonomous Vehicles are no longer an innovation of the future (seen only in science fiction) but are now being road-tested for use. And yet while the technical and economic success and possibilities of the AV have been widely debated, there has been a notable lack of discussion around the social, behavioural, and environmental implications. This book is the first to address these issues and to deeply consider the environmental and social sustainability outlook for the AV and how it will impact on communities. Environmental and social sustainability are goals unlike those of technical development (a new tool) and economic development (a new investment). The goal of sustainability is development of societies that live well and equitably within their ecological limits. Is it reasonable and desirable that only technical and economic success comprise the swelling AV parade, or should we be looking at the wider impacts on personal well-being, wider society, and the environment? The uptake for AVs looks to be lengthy, disjointed, and episodic, in large measure because it faces a range of known unknown risks. This book assesses the environmental and social sustainability potential for AVs based on their prospective energy use and their impacts on climate change, urban landscapes, public health, mobility inequalities, and individual and social well-being. It examines public attitudes about AV use and its risk of fostering a rebound effect that compromises potential sustainability gains. The book concludes with a discussion of critical issues involved in sustainable AV diffusion.

This book introduces the electromagnetic compatibility(EMC) of electric vehicle(EV), including EMC of the whole vehicle, electromagnetic interference(EMI) prediction and suppression of motor drive system, EMI prediction and suppression of DC-DC converter, electromagnetic field safety and EMC of wireless charging system, signal integrity and EMC of the vehicle controller unit(VCU), EMC of battery management system(BMS), electromagnetic radiated emission diagnosis and suppression of the whole vehicle, etc. The analysis method, modeling and simulation method, test method and rectification method of EMC are demonstrated. The simulation and experimental results are presented as tables and figures. This book is useful as reference for graduate students, senior undergraduates and engineering technicians of vehicle engineering related majors. For EMI

prediction, suppression and EMC optimization design for EVs, this book provides reference for engineers to solve EMC problems. This book is intended for senior undergraduates, postgraduates, lecturers and laboratory researchers engaged in electric vehicle and electromagnetic compatibility research.

Conceived in dream. Born a nightmare. There are a lot of things I know: story structure, Hollywood trivia, what makes a director great... It's the stuff I didn't know-who my real father was, that my uncle is a demon, the fact that I'm not human-that's gotten me into so much trouble. After ripping my crush's heart out-literally-I discover that I'm not just a normal autistic seventeen-year-old. I'm the daughter of the King of Nightmares, the cruel and excessively goth ruler of the Nether. Now, I'm stuck at Miss Perkins's School for Girls, learning how to exist in a world where things really do go bump in the night. Dangerous magic, treacherous enemies, unfairly hot vampires, and magic schools are all tropes I love in movies. But throw them into my real life? Hard pass. And I still have to deal with queen bees and bullies while unraveling a conspiracy that could crumble the very foundations of reality as we know it? That's bullsh-

Providing a comprehensive overview of hot stamping (also known as ‘press hardening’), this book examines all essential aspects of this innovative metal forming method, and explores its various uses. It investigates hot stamping from both technological and business perspectives, and outlines potential future developments. Individual chapters explore topics such as the history of hot stamping, the state of the art, materials and processes employed, and how hot stamping is currently being used in the automotive industry to create ultra-high-strength steel components. Drawing on experience and expertise gathered from academia and industry worldwide, the book offers an accessible resource for a broad readership including students, researchers, vehicle manufacturers and metal forming companies.

This proceedings volume contains papers that have been selected after review for oral presentation at ROMANSY 2016, the 21th CISM-IFTToMM Symposium on Theory and Practice of Robots and Manipulators. These papers cover advances on several aspects of the wide field of Robotics as concerning Theory and Practice of Robots and Manipulators. ROMANSY 2016 is the 21st event in a series that started in 1973 as one of the first conference activities in the world on Robotics. The first event was held at CISM (International Centre for Mechanical Science) in Udine, Italy on 5-8 September 1973. It was also the first topic conference of IFTToMM (International Federation for the Promotion of Mechanism and Machine Science) and it was directed not only to the IFTToMM community.

This book tells the story of the HIV epidemic in South Africa, and asks why, after more than three decades, it has not normalised. Despite considerable efforts to prevent infection, and ambitious targets set to end the epidemic by 2030, HIV infections are increasing among young women and treatment uptake and adherence have been uneven. Focusing on the years preceding and following treatment access, this book addresses why an end to AIDS may be misplaced optimism. By examining public discourses and private narratives about infection, illness and death, this work reveals the contradictions between the lived experiences of AIDS suffering on the one hand, and biomedical certainties on the other. Based on long-term ethnographic research in rural villages of the South African lowveld, and within HIV prevention interventions in South Africa more generally, this book offers an intimate perspective on the social and cultural responses to the epidemic.

This book provides an analysis of the luxury industry in two of the world's biggest and evolving markets, and identifies and discusses the key issues and dynamics in transforming their luxury landscapes. By discussing the elements that are most likely to dominate boardroom agendas, the pragmatic implications for both strategic and marketing planning are made clear. Special emphasis is placed upon well-contemplated responses to luxury brand marketing challenges that executives are likely to face as they push their brands to adapt and thrive in these shifting markets.
