Stapleton's Real Estate Management Practice Bentley Publishers

Previously known as Estate Management Practice, the fourth edition of this work has been renamed to reflect current market practice and to embrace the discipline of corporate real estate. This book provides a comprehensive study of the management of urban property and is divided into three parts. Part one considers the diverse nature of the many types of estates and different aspects and interpretations of the management task. Part two concentrates on the management of leased property, repairs, service charges and rent reviews and the statutory framework within which the landlord and tenant relationship has developed. Part three is concerned with the positive management covering both technical skills, such as portfolio performance, and the professional practice environment in which they are exercised. Stapleton's Real Estate Management Practice is written both for advanced students and practitioners. It provides a firm basis for management affecting the decision-making hierarchy from tenant to property, to portfolio, to proprietary unit. While retaining the format of previous editions, it has been updated to reflect the many changes in the law, practice, technology and the market place since the previous edition. In addition, this new edition highlights factors that influence the enhancement of different types of property and the various strategies involved in managing properties from both owners' and occupiers' point of view.

Popular Science

Fifteen years after Toyota announced it would build a manufacturing plant in the heart of the Bluegrass, Kentucky crafts are being used to help sell Camrys at car dealerships in Japan and sushi and Japanese condiments are widely stocked on grocery shelves in a number of cities across Kentucky.

In early 2000, the state boasted more than 100 Japanese companies representing a total investment of more than seven billion dollars, employing more than 33,000 Kentuckians. Japan in the Bluegrass is the first book to focus on the regional and local impact of the globalization of Japanese businesses, particularly Toyota, in the United States. Fourteen American and Japanese contributors include geographers, political scientists, sociologists, and an economist, urban planner, and environmental scientist, and their essays go beyond the traditional exploration of politics and economics to examine the social, cultural, and environmental effects of Japanese investment in Kentucky. The authors examine the factors that brought these companies to this part of the United States, which range from a well-developed system of highways to cooperation from state and local governments to hefty incentive packages. They discuss the significant influence of Toyota and its suppliers on local communities in Kentucky as well as in Toyota City, Japan. Essays also cover the social and cultural shifts that have resulted from Japanese investment, including educational activities in public schools, the relationship between business and local media, and the integration of Japanese managers and their families into Kentucky communities.
