*The Sociology of Food* Princeton Book Company Publishers

A classic text about the social study of food, this is the first English language edition of Jean-Pierre Poulain's seminal work. Tracing the history of food scholarship, The Sociology of Food provides an overview of sociological theory and its relevance to the field of food. Divided into two parts, Poulain begins by exploring the continuities and changes in the modern diet. From the effect of globalization on food production and supply, to evolving cultural responses to food - including cooking and eating practices, the management of consumer anxieties, and concerns over obesity and the medicalization of food - the first part examines how changing food practices have shaped and are shaped by wider social trends. The second part provides an overview of the emergence of food as an academic focus for sociologists and anthropologists. Revealing the obstacles that lay in the way of this new field of study, Poulain shows how the discipline was first established and explains its development over the last forty years. Destined to become a key text for students and scholars, The Sociology of Food makes a major contribution to food studies and sociology. This edition features a brand new chapter focusing on the development of food studies in the English-speaking world and a preface, specifically written for the edition.

**Mr. Vail Is in Town** California Bill's Automotive Handbooks

When the first edition of this book appeared in 1978, it was warmly received. Most readers and reviewers especially valued the extensive coverage of the literature in the chapters dealing with the different crops. ``... a valuable and timely addition to plant breeders and of outstanding value to breeders of ornamental plants. The book's special strength resides in the extensive review of literature ...'' (International Journal for Breeding Research). This is also reflected by the many times that the work has been referred to in other publications. This new edition provides plant breeders as well as scientists with an up-to-date overview of methods and results of the application of mutation breeding in order to genetically improve vegetatively propagated crops. General principles and background information about mutation breeding in general, methods of treatment, material to be treated and results are discussed in the introductory chapters, followed by a description of the specific situation in each of the vegetatively propagated crops ever used in a mutation breeding project. This volume brings together all the important and relevant literature in the field. It provides a complete account of mutation breeding of vegetatively produced crops, presenting conclusions about the value of the method, its possibilities, limitations and shortcomings and the possible difficulties of further application in various crops. The initial chapters deal with the interactions between mutagenic treatment and plant material, such as aspects of mutagenic treatment, post-irradiation behaviour of shoot apices and adventitious bud techniques. All available literature is then discussed crop by crop and critically evaluated. Almost 1700 references are covered and whenever possible suggestions for more efficient application of mutation breeding methods are given.

The Higher Education Act of 1965 (HEA; P.L. 89-329) authorizes numerous federal aid programs that provide support to both individuals pursuing a postsecondary education and institutions of higher education (IHEs). Title IV of the HEA authorizes the federal government's major student aid programs, which are the primary source of direct federal support to students pursuing postsecondary education. Titles II, III, and V of the HEA provide institutional aid and support. Additionally, the HEA authorizes services and support for less-advantaged students (select Title IV programs), students pursuing international education (Title VI), and students pursuing and institutions offering certain graduate and professional degrees (Title VII). Finally, the most recently added title (Title VIII) authorizes several other programs that support higher education. The HEA was last comprehensively reauthorized in 2008 by the Higher Education Opportunity Act of 2008 (HEOA; P.L. 110-315), which authorized most HEA programs through FY2014. Following the enactment of the HEAO, the HEA has been amended by numerous other laws, most notably the SAFRA Act, part of the Health Care and Education Reconciliation Act of 2010 (P.L. 111-152), which terminated the authority to make federal student loans through the Federal Family Education Loan (FFEL) program. Authorization of appropriations for many HEA programs expired at the end of FY2014 but has been extended through FY2015 under the General Education Provisions Act. This report provides a brief overview of the major provisions of the HEA.
