Super Founders uses a data-driven approach to understand what really differentiates billion-dollar startups from the rest—revealing that nearly everything we thought was true about them is false! Ali Tamaseb has spent thousands of hours manually amassing what may be the largest dataset ever collected on startups, comparing billion-dollar startups with those that failed to become one—30,000 data points on nearly every factor: number of competitors, market size, the founder's age, his or her university's ranking, quality of investors, fundraising time, and many, many more. And what he found looked far different than expected. Just to mention a few: Most unicorn founders had no industry experience; There's no disadvantage to being a solo founder or to being a non-technical CEO; Less than 15% went through any kind of accelerator program; Over half had strong competitors when starting--being first to market with an idea does not actually matter. You will also hear the stories of the early days of billion-dollar startups first-hand. The book includes exclusive interviews with the founders/investors of Zoom, Instacart, PayPal, Nest, Github, Flatiron Health, Kite Pharma, Facebook, Stripe, Airbnb, YouTube, LinkedIn, Lyft, DoorDash, Coinbase, and Square, venture capital investors like Elad Gil, Peter Thiel, Alfred Lin from Sequoia Capital and Keith Rabois of Founders Fund, as well as previously untold stories about the early days of ByteDance (TikTok), WhatsApp, Dropbox, Discord, DiDi, Flipkart, Instagram, Careem, Peloton, and SpaceX. Packed with counterintuitive insights and inside stories from people who have built massively successful companies, Super Founders is a paradigm-shifting and actionable guide for entrepreneurs, investors, and anyone interested in what makes a startup successful.

The co-founder and longtime president of Pixar updates and expands his 2014 New York Times bestseller on creative leadership, reflecting on the management principles that built Pixar's singularly successful culture, and on all he learned during the past nine years that allowed Pixar to retain its creative culture while continuing to evolve. "Might be the most thoughtful management book ever."—Fast Company For nearly thirty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Finding Nemo, The Incredibles, Up, and WALL-E, which have gone on to set box-office records and garner eighteen Academy

Awards. The joyous storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student, and then forged a partnership with George Lucas that led, indirectly, to his founding Pixar with Steve Jobs and John Lasseter in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the twenty-five movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on philosophies that protect the creative process and defy convention, such as: • Give a good idea to a mediocre team and they will screw it up. But give a mediocre idea to a great team and they will either fix it or come up with something better. • It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody. Creativity, Inc. has been significantly expanded to illuminate the continuing development of the unique culture at Pixar. It features a new introduction, two entirely new chapters, four new chapter postscripts, and changes and updates throughout. Pursuing excellence isn't a one-off assignment but an ongoing, day-in, day-out, full-time job. And Creativity, Inc. explores how it is done.

In Munich 1942-43, handbills appeared-some in mailboxes-some left secretly on parked cars-others still, surfaced in city phone booths. The words condemned Adolf Hitler and the Nazi regime and called Germans to passive resistance. The message, penned and distributed by a handful of student-soldiers and other youthful associates who had come of age during the twelve-year catastrophe of the Third Reich, hoped to stir the conscience of a nation. The regime had tempted them with promises of power and prosperity. In time, the youths made their way through a labyrinth of propaganda, confusion, and personal conflict, arriving at the threshold of their own inner convictions—a passage bringing them to a destination called the White Rose. Among the recipients of the Leaflets of the White Rose were teachers the group hoped would spread the call to resistance. A university professor accepted their challenge. Sixty years later, an American teacher felt compelled to learn and follow the story, not knowing when she began, that it would lead her to the spirit of the White Rose that lives yet today. Along with three fellow educators, Ruth traveled to Germany to dialogue with schools now named for members of the White Rose. On a quiet country lane or a busy city street, teachers toil daily, urging students to think critically, stay informed, and develop skills that will nurture and renew the freedoms the White Rose could only imagine. Journey to the White Rose in Germany is an invitation to encounter a past that inspires the present and the future. In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Homicide Detective Ned Danes discovers that an ambitious Deputy D.A. has concealed evidence of an accused murderer's innocence in order to secure a headline-grabbing conviction. Danes is warned that a smart guy would keep his mouth shut. More interested in being a good guy than a smart one, Danes torpedoes the corrupt Deputy D.A.'s case, and for his honesty, Danes is exiled to the tiny basement office of the Cold Case Squad. Working in his forgotten outpost Danes becomes obsessed with finding the real killer whom the Deputy D.A.'s scheme has allowed to run free. But just as he seems to be closing in Danes receives a plea for help from an old friend. FBI agent Phillip Abbott has been put on leave for his last sixty days before his forced retirement. He has that long to catch a drug-cartel hit man whose specialty is murdering entire families. Completely alone, Abbott needs a courageous cop like Ned Danes to back him up. While Danes knows that Abbott has a seventeen-year-old adopted daughter named Jessica, it is only after Danes agrees to help catch the killer that he discovers that the hit man murdered Jessica's entire family. When he adopted Jessica Abbott promised her that he would get the monster who killed her family no matter what it took and Danes soon learns that Abbott is willing to do anything, including break the law and possibly go to prison, to keep that promise. And that's only a fraction of the story.

Life's Wonderful Journey is designed to be a celebration of life and an inspiration to younger generations that they, like the author can overcome hardship. Throughout the book, the author recounts life experiences, urging readers to set and stay focused on goals; the piece is filled with lessons learned about responsibility, commitment, hard work and faith. The content of the book reveals so many aspects of the authors life while growing up, the experiences, obstacles and successes encountered, be they uplifting or disappointing, and how all of these were dealt with as he continued on in life. The author is convinced that the current and future generations need to be apprised of the hardships, sufferings, defeat and victories that his generation encountered, so they be prepared to confront similar situations in life should they arise. In spite of the extraordinary and difficult life that was endured over the many years, one thing is certain, in good times and bad, the constant blessings showered upon his family by the Almighty God in fact made his life a wonderful journey.

"Readers looking for inspiration (or just a great story) will discover a wild ride that proves just how twisty some paths to Christ can be." - Publisher's Weekly
Many of us would say it takes guts and a little bit of crazy to step toe-to-toe with a powerful, 1,700 pound bull. For Hall-of-Fame bullfighter, Jeremy Sparks, it took faith. Sparks' remarkable and illustrious journey began at a young age when he received a God-given calling to become a professional bullfighter. Soon after accepting a college scholarship for rodeo, he suffered a near-fatal electrocution, which, but for his faith in God, would have ruined his dream. After three years of training under a world champion, he was accepted into the elite Professional Rodeo Cowboys Association, and spent years tussling with raging bulls until God, once again, showed him another path. While the terrorist attack on September 11th rocked the country, Sparks saw it as an invitation to serve. He enlisted just weeks after the attack, and earned his commission as a second lieutenant in the US Air Force and an endorsement from the Pentagon

as the "only professional bullfighter in the history of the USAF." Once a small town kid from Arkansas, now a Hall-of-Fame rodeo icon, Sparks is sharing his stories of strength and service. With God at the center of this fascinating story, Go West highlights the 10 Biblical principles that Sparks learned, experienced, and lived by as a professional bull fighter, officer in the armed forces, and follower of Jesus Christ.

NATIONAL BEST SELLER • The basis for the HBO documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic odds with the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallows describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams, and the determination of many who are in the midst of making things better. Our Towns is the story of their journey—and an account of a country busy remaking itself.

Named one of Vulture 's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed

reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In The Cult of Smart, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we ' ll never achieve this dream until the Cult of Smart is destroyed.
