The Book of R John Wiley & Sons

First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, "marked a real turning point . . . and proved that a war can be won by airpower alone." Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower—the members of the 40th Expeditionary Operations Group. Their descriptions—a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot—provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

The *Understanding by Design Guide to Creating High-Quality Units* offers instructional modules on the basic concepts and elements of Understanding by Design (UbD), the "backward design" approach used by thousands of educators to create curriculum units and assessments that focus on developing students' understanding of important ideas. The eight modules are organized around the UbD Template Version 2.0 and feature components similar to what is typically provided in a UbD design workshop, including—* Discussion and explanation of key ideas in the module; * Guiding exercises, worksheets, and design tips; * Examples of unit designs; * Review criteria with prompts for self-assessment; and * A list of resources for further information. This guide is intended for K-16 educators—either individuals or groups—who may have received some training in UbD and want to continue their work independently; those who've read *Understanding by Design* and want to design curriculum units but have no access to formal training; graduate and undergraduate students in university curriculum courses; and school and district administrators, curriculum directors, and others who facilitate UbD work with staff. Users can go through the modules in sequence or skip around, depending on their previous experience with UbD and their preferred curriculum design style or approach. Unit creation, planning, and adaptation are easier than ever with the accompanying downloadable resources, including the UbD template set up as a fillable PDF form, additional worksheets, examples, and FAQs about the module topics that speak to UbD novices and veterans alike.

This book takes you on my journey of becoming a car dealer. It offers a bird's-eye view of the automobile industry. It evaluates the conditions under which I and many other Black car dealers operate in order to determine why so many of us failed. In 2005 there were 751 new car franchise-rooftops owned by African Americans. As of December 2017, that number declined drastically to 270, out of a total of 19,284 American new car franchise-rooftops. In 2005, black car dealers accumulated billions of dollars in wealth; unfortunately, they lost most of it when the recession ended in 2009. Yet African Americans continue to purchase new cars in record numbers. African Americans purchased 1,105,931 new cars in 2015, with gross revenue of \$35,357,792,000, most of which went to white car dealers. With an annual growth rate of 9.4%, it's estimated that African Americans will purchase over 1.5 Million New Cars in 2020, with gross reveue surpassing \$50 Billion!With African Americans owning only 1.4% of car dealerships nationwide, can we afford to give \$50 Billion dollars of our hard-earned income every freaking year to folks who don't look like us? \$50 Billion dollars circulating within the African American community can go a long way and will do wonders for African Americans! It will create jobs with fair incomes and will allow Blacks to purchase houses that appreciate in value instead of simply buying cars that depreciate. Ultimately, it will allow Blacks to build wealth. After all, it's our damn money! In September of 1992, at the age of 36, after a 10-year career as a Business Consultant for Ford Motor Company and a Ford Dealer Trainee, I joined the ranks of the Black car dealers in America and became the proud owner of a Lincoln Mercury franchise in St. Louis, Missouri. Five years later, like the majority of Black car dealers, I lost my franchise.Dealing chronicles the emotional highs and lows I experienced both before and after becoming a Black car dealer.

Getting the Message Through, the companion volume to Rebecca Robbins Raines' *Signal Corps*, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision--that command of the air is all important in modern warfare--has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

The transformation of schooling from a twelve-year jail sentence to freedom to learn. John Taylor Gatto's *Weapons of Mass Instruction*, now available in paperback, focuses on mechanisms of traditional education which cripple imagination, discourage critical thinking, and create a false view of learning as a byproduct of rote-memorization drills. Gatto's earlier book, *Dumbing Us Down*, introduced the now-famous expression of the title into the common vernacular. *Weapons of Mass Instruction* adds another chilling metaphor to the brief against conventional schooling. Gatto demonstrates that the harm school inflicts is rational and deliberate. The real function of pedagogy, he argues, is to render the common population manageable. To that end, young people must be conditioned to rely upon experts, to remain divided from natural alliances and to accept disconnections from their own lived experiences.

They must at all costs be discouraged from developing self-reliance and independence. Escaping this trap requires a strategy Gatto calls "open source learning" which imposes no artificial divisions between learning and life. Through this alternative approach our children can avoid being indoctrinated-only then can they achieve self-knowledge, good judgment, and courage.
