True muscle cars make no apologies. They had one primary job: get the driver from Point A to Point B as fast as law, and the driver's driving ability, would allow. They started off in the early 1960s as mid-size sedans and coupes stuffed with oversized engines - Bel Airs, Catalinas, and Tempests - and it wasn't long before crazy hi-po machines came in all shapes in sizes. Mustangs, Camaros, Chargers, Chevelles, 4-4-2s, Gran Sports ... they all had one thing in common: big engines, and big performance. In Nothin' But Muscle, you'll find 199 of the greatest

American performance cars ever built. From the earliest 1964 GTO, to the Shelby-built muscle/racers of the late-â € ~ 60s, to the ferocious Buicks of the 1980s and 500-plus-hp Viper and Corvette rocketships of today. Nothin' But Muscle brings you the most memorable and beloved pavement eaters ever seen on American soil.

Viper - 25 Years of Hissstory
Viper - 25 Years of Hissstory
The complete history of the Dodge Viper automobile from the 1989 concept car to the final 2017 Gen V ACR. Covers all five generations with

behind the scenes stories, original photography by the author who lived the experience first hand. Dodge Viper
Uncover the captivating history of the highest-performance cars in America, illustrated with beautiful photography. The American muscle car began not in the factories of the big three automakers, but in the garages and dealerships of a hot-rod subculture bent on making the hottest, highest-performance cars on the street. The Complete Book of American Muscle Supercars catalogs these amazing cars, along with the builders who

unleashed them on the American scene. From Michigan's Royal Pontiac dealership and the souped-up Royal Pontiac Bobcats they built and sold, to the new cars from such fabled names as Carroll Shelby, Mr. Norm's Grand Spaulding Dodge, Nickey Chevrolet, Don Yenko, George Hurst, Baldwin-Motion, Calloway, SLP, and Steve Saleen. This gorgeously illustrated book chronicles the outstanding contribution of the tuner/builder to American automotive history through the amazing machines they created. From the

oldest of these muscle tuners commanding top dollar at today's classic-car auctions, to the latest vehicles by Ford and Chrysler, with their SVT and SRT divisions, this book gives readers a full and fascinating look at American high-performance in its purest form.

Consumers Index to Product Evaluations and Information Sources CarTech Inc
Now in paperback, this book covers Chrysler's incredible series of muscle cars. In 1955 Chrysler introduced the first of its famed 300 "letter series" cars. The company designed a stylish, sporty car, stuffed in one of its potent Hemi engines,

and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of

America; they ruled not just the streets, but the drive ins and parking lots. Nothing was cooler than Mopar muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. "This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful backdrops, it would be hard to go wrong, but Newhardt

went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is obvious that Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a bargain." - Classic Car Weekly (UK) Veloce Publishing Ltd

The Dodge Viper was one of the first cars to use the powerful V-10 engine. Today,

it's one of the fastest sports cars around. Including captivating photographs and fascinating information about the Viper's introduction in the 1990s, this book will appeal to all car enthusiasts who feel a need for speed.

Mopar Muscle

Containing more than 18,000 codes, cheats, and unlockables for more than 1,500 of the most popular current and next-gen games on the biggest platforms, including PS3, Wii, and Xbox 360, this guide is a must-have for all gamers. Original.

Autocar

The Viper stunned Americans by

showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V10-powered car that could run with the best. Team Viper went a step further at Le Mans, proving that an American car could handle turns, too; so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. This book covers the transition from a concept to a rough and brutal rocket to a world-class supercar, and includes every

generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder, and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical, and enthusiast perspectives. The book looks at the business case for each generation, the development stories and their outcomes, and

describes some of the issues owners may have to watch out for, particularly in the early models.

Kiplinger's Personal Finance

The Dodge Viper has quickly joined the ranks of iconic American sports cars alongside the Corvette and Mustang. In this revision of his bestselling ECS title, "Motor Trends Matt Stone traces the Viper story from its conception and path to production, through to the newest Viper, the SRT-10. New photography sheds

light on the Viper's impressive racing history and model evolution.

Dodge Vipers

Since the 1950s, Dodge has produced a series of charismatic performance cars that have given the company a unique reputation among American car makers. The original Charger and Challenger and the more recent Viper and Caliber SRT are outstanding examples of the company's commitment to cars of high performance and aggressive styling. Peter Grist's pictorial history of these typically

American machines gives a fascinating insight into their ancestry and evolution and celebrates the huge impact they have made on the road and on the track. His account is an exciting introduction that will appeal to everyone who is interested in American automobile history. When the first Dodge performance cars were conceived in the early 1950s, they were a brave step for a company that was well known for its dependable saloons and pickups. Peter Grist describes this change of direction and the radical new thinking

that resulted in the creation of the innovative Dodge Hemi V8 of 1953. This remarkable engine provided the power for the first sporting Dodges and led to the race-bred D-500 series of 1956, the first Dodge Muscle car. But Dodge's reputation for creating big, potent, sporting cars was really consolidated in the 1960s and early 1970s the muscle-car era when the Dart, Charger and Challenger were so successful on the road, the race track and drag strip. The book features these historic cars and the drivers who have raised Dodge to a pre-eminent position

over the last 50 years. Featuring illustrations of Dodge's styling experiments and concept cars, which had such a strong effect on their production models, from the first Dodge concept the 1954 Firearrow up to the most recent Challenger and Hornet. The book brings together an evocative collection of over 200 photographs and adverts that offer a unique look at ALL of Dodge's fast cars in one book. This is an entertaining and informative guide to the Dodge tradition which will be essential reading for Dodge enthusiasts and for everyone

who enjoys their cars at full speed.
