- Chronicles the first all-African American summit attempt on Denali, the highest point in North America
- Part adventure story, part history, and part argument for the importance of inspiring future generations to value nature

The nation ' s wild places—from national and state parks to national forests, preserves, and wilderness areas—belong to all Americans. But not all of us use these resources equally. Minority populations are much less likely to seek recreation, adventure, and solace in our wilderness spaces. It ' s a difference that African American author James Mills addresses in his new book, *The Adventure Gap: Changing the Face of the Outdoors*. Bridging the so-called “adventure gap” requires role models who can inspire the uninitiated to experience and enjoy wild places. Once new visitors are there, a love affair often follows. This is important because as our country grows increasingly multicultural, our natural legacy will need the devotion of people of all races and ethnicities to steward its care. In 2013, the first all-African American team of climbers, sponsored by the National Outdoor Leadership School (NOLS), challenged themselves on North America ' s highest point, the dangerous and forbidding Denali, in Alaska. Mills uses Expedition Denali and its team members ' adventures as a jumping-off point to explore how minority populations view their place in wild environments and to share the stories of those who have already achieved significant accomplishments in outdoor adventures—from Mathew Henson, a Black explorer who stood with Peary at the North Pole, to Kai Lightner, a teenage sport climber currently winning national competitions. The goal of the expedition, and now the book, is to inspire minority communities to look outdoors for experiences that will enrich their lives, and to encourage them toward greater environmental stewardship.

United States Board on Geographic Names: Gazetteer Penguin

A long needed account of the human invasion of this rugged Texas desert land.

Hilllat El-Arab British Archaeological Reports Limited

Collects photographs and letters from teenage girls asked to describe or define themselves and their world.

In *Fighting Stock*, Richard B. McCaslin illuminates numerous facets of Ford's life typically overshadowed by emphasis on his identity as Ranger and soldier in nineteenth-century Texas. In this third volume of the *Texas Biography Series*, published by TCU Press and The Center for Texas Studies, McCaslin reveals Ford as a man spurred on by the legacy of his nation-building grandfathers and his own strong convictions and energy to become a force in shaping Texas as a Southern state before and after the Civil War. Ford's battles as a Ranger, and as a leader of Texas' military forces allied with the Confederacy, were only part of his legacy in Texas history. He was also a physician, lawyer, and the editor of several newspapers, and among his many roles in politics and civil service were multiple terms as a state legislator and the mayoralty of Austin and Brownsville. Later in life, he fought to preserve Texas history and wrote his own extensive memoirs. Known for his courage and toughness as a military commander, Ford was also a talented strategist, diplomat, and community leader. McCaslin's in-depth historical detail paints a full picture of this famous Texan, a fighter not only on the battlefield, but on the civic and political fields as well.

The stunning, never before told story of the quixotic attempt to recreate small-town America in the heart of the Amazon In 1927, Henry Ford, the richest man in the world, bought a tract of land twice the size of Delaware in the Brazilian Amazon. His intention was to grow rubber, but the project rapidly evolved into a more ambitious bid to export America itself, along with its golf courses, ice-cream shops, bandstands, indoor plumbing, and Model Ts rolling down broad streets. Fordlandia, as the settlement was called, quickly became the site of an epic clash. On one side was the car magnate, lean, austere, the man who reduced industrial production to its simplest motions; on the other, the Amazon, lush, extravagant, the most complex ecological system on the planet. Ford's early success in imposing time clocks and square dances on the jungle soon collapsed, as indigenous workers, rejecting his midwestern Puritanism, turned the place into a ribald tropical boomtown. Fordlandia's eventual demise as a rubber plantation foreshadowed the practices that today are laying waste to the rain forest. More than a parable of one man's arrogant attempt to force his will on the natural world, Fordlandia depicts a desperate quest to salvage the bygone America that the Ford factory system did much to dispatch. As Greg Grandin shows in this gripping and mordantly observed history, Ford's

great delusion was not that the Amazon could be tamed but that the forces of capitalism, once released, might yet be contained.

Fordlandia is a 2009 National Book Award Finalist for Nonfiction.

Dearborn Independent University of Alaska Press

This definitive work, the crown jewel in the distinguished career of Russian America scholar Lydia T. Black, presents a comprehensive overview of the Russian presence in Alaska. Drawing on extensive archival research and employing documents only recently made available to scholars, Black shows how Russian expansion was the culmination of centuries of social and economic change. Black's work challenges the standard perspective on the Russian period in Alaska as a time of unbridled exploitation of Native inhabitants and natural resources. Without glossing over the harsher aspects of the period, Black acknowledges the complexity of relations between Russians and Native peoples. She chronicles the lives of ordinary men and women the merchants and naval officers, laborers and clergy who established Russian outposts in Alaska. These early colonists carried with them the Orthodox faith and the Russian language; their legacy endures in architecture and place names from Baranof Island to the Pribilofs. This deluxe volume features fold-out maps and color illustrations of rare paintings and sketches from Russian, American, Japanese, and European sources many have never before been published. An invaluable source for historians and anthropologists, this accessible volume brings to life a dynamic period in Russian and Alaskan history. A tribute to Black's life as a scholar and educator, "Russians in Alaska" will become a classic in the field."

Car values fluctuate wildly, never more so than in our current economic environment. Pricing information is a must for collectors, restorers, buyers, sellers, insurance agents and a myriad of others who rely on reliable authoritative data. With well over 300,000 listings for domestic cars and light trucks, and various import vehicles manufactured between 1901 and 2012, this is the most thorough price guide on the market. This invaluable reference is for the serious car collector as well as anyone who wants to know the value of a collector car they are looking to buy or sell. Prices in this must-have reference reflect the latest values, in up to six grades of condition, from the esteemed Old Cars Price Guide database. New information for the most recent model year will also be added to our new Old Car Report database.

[Command Of The Air](#) Universe

A native Georgian, James Hughes Callahan (1812–1856) migrated to Texas to serve in the Texas Revolution in exchange for land. In Seguin, Texas, where he settled, he met and married a divorcée, Sarah Medissa Day (1822–1856). The lives of these two Texas pioneers and their extended family would become so entwined in the events and experiences of the nascent nation and state that their story represents a social history of nineteenth-century Texas. From his arrival as a sergeant with the Georgia Battalion, through the ill-fated 1855 expedition that bears his name, to his shooting death in a feud with a neighbor, Callahan was a soldier, a Texas Ranger, a rancher, and a land developer, at every turn making his mark on the evolving Guadalupe River Basin. Separately, Sarah's family's journey reflected the experience of many immigrants to Texas after its war of independence. Thomas O. McDonald traces the pair's respective paths to their meeting, then follows as, together, they contend with conflict, troublesome social mores, the emergence of new industries, and the taming of the land, along the way helping to shape the Texas culture we know today. With a sharp eye for character and detail, and with a wealth of material at his command, author Thomas O. McDonald tells a story as crackling with life as it is steeped in scholarly research. In these pages the lives of the Callahan and Day families become a canvas on which the history of Texas—from revolution, frontier defense, and Indian wars to Anglo settlement and emerging legal and social systems—dramatically, inexorably unfolds.

Shackleton's Antarctic journey took courage and perseverance. Now his story is told in a full-color early chapter book! In 1914, Ernest Shackleton and his crew set out for the South Pole. They never made it. Within sight of land, the ship ran into dangerous waters filled with chunks of ice. Then the sea froze around them! There was no hope of rescue. Could Shackleton find a way to save himself and his men?

Fordlandia University of Oklahoma Press

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point

where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

The two tombs examined here date to the beginning of that obscure period of Nubian history coinciding with the end of Egyptian colonization and the foundation of the independent Kingdom of Kush with its capital at Napata. This volume details the excavations at the Hillat el-Arab necropolis.

The Big Bend University of Texas Press

A landmark volume exploring covert bias, prejudice, and discrimination with hopeful solutions for their eventual dissolution Exploring the psychological dynamics of unconscious and unintentional expressions of bias and prejudice toward socially devalued groups, *Microaggressions and Marginality: Manifestation, Dynamics, and Impact* takes an unflinching look at the numerous manifestations of these subtle biases. It thoroughly deals with the harm engendered by everyday prejudice and discrimination, as well as the concept of microaggressions beyond that of race and expressions of racism. Edited by a nationally renowned expert in the field of multicultural counseling and ethnic and minority issues, this book features contributions by notable experts presenting original research and scholarly works on a broad spectrum of groups in our society who have traditionally been marginalized and disempowered. The definitive source on this topic, *Microaggressions and Marginality* features: In-depth chapters on microaggressions towards racial/ethnic, international/cultural, gender, LGBT, religious, social, and disabled groups Chapters on racial/ethnic microaggressions devoted to specific populations including African Americans, Latino/Hispanic Americans, Asian Americans, indigenous populations, and biracial/multiracial people A look at what society must do if it is to reduce prejudice and discrimination directed at these groups Discussion of the common dynamics of covert and unintentional biases Coping strategies enabling targets to survive such onslaughts Timely and thought-provoking, *Microaggressions and Marginality* is essential reading for any professional dealing with diversity at any level, offering guidance for facing and opposing microaggressions in today's society.

Statement of Disbursements of the House Texas A&M University Press

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

Military Operations of the Civil War Pickle Partners Publishing

History books tell much about Lewis and Clark's expedition West. But what is less known is how far the explorers went to ensure their entire team had an equal voice in decision-making, even though women and slaves were excluded from democracy in the nation.

The Car Book 2007 maier sorin

First published in 1988, *Castle Gap* and the Pecos Frontier was acclaimed by reviewers as "superb," "significant," and "utterly delightful." In this revised edition, Patrick Dearen draws upon the latest in scholarship to update his study of the Pecos River country of West Texas. It's a land wild with tales that blend history, geography, and folklore, and from his search emerge six fascinating accounts: -Castle Gap, a break in a mesa twelve miles east of the Pecos River, used by Comanches, emigrants, stage drivers, and cattle drovers; -Horsehead Crossing, the most infamous ford of the Old West; -Juan Cordona Lake, a salt lake where sandstorms and skull-baking sun defied early efforts to mine salt vital to survival; -The "bulto" or ghost who wanders the Fort Stockton night; -Lost Wagon Train, a forty-wagon caravan buried in the sands; -The lost mine of Will Sublett, who found gold and kept its location secret unto death. Although linked by the search for treasure, the stories are as varied as the land itself. They speak eloquently of the Pecos country, its heritage, and its people.

The Republic of Texas was still in its first exultation over independence when John Salmon "Rip" Ford arrived from South Carolina in June of 1836. Ford stayed to participate in virtually every major event in Texas history during the next sixty years. Doctor, lawyer, surveyor, newspaper reporter, elected representative, and above all, soldier and Indian fighter, Ford sat down in his old age to record the events of the turbulent years through which he had lived. Stephen Oates has edited Ford's memoirs to produce a clear and vigorous personal history of Texas.
