Despotism on Demand draws attention to the impact of flexible scheduling on managerial power and workplace control. When we understand paid work as a power relationship, argues Alex J. Wood, we see how the spread of precarious scheduling constitutes flexible despotism; a novel regime of control within the workplace. Wood believes that flexible despotism

represents a new domain of inequality, in which the postindustrial working class increasingly suffers a scheduling nightmare. By investigating two of the largest retailers in the world he uncovers how control in the contemporary "flexible firm" is achieved through the insidious combination of "flexible discipline" and "schedule gifts." Flexible discipline provides managers with an arbitrary means by which to punish

workers, but flexible scheduling also requires workers to actively win favor with managers in order to receive "schedule gifts": more or better hours. Wood concludes that the centrality of precarious scheduling to control means that for those at the bottom of the postindustrial labor market the future of work will increasingly be one of flexible despotism.

Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

This book is based on an important but complicated question: How have nonprofit human service organizations sustained themselves over time? It documents the organizational histories of pioneering nonprofits that have unique missions and

significant longevity – in one case, 157 years. This volume provides one of the few documented histories of nonprofit human service organizations and includes a cross-case analysis of the major themes that help to expand our understanding of organizational lifecycles with respect to organizational growth and resilience. The major themes appear in the form of clusters of organizations that are exemplars of: leadership (experiences of either founding or long-term

executive directors); internal operations (capacity to respond to changing community needs); and external relations (capacity to develop unique and/or sustained relationships with funding sources and/or donor populations). These cases also provide students of nonprofit management with opportunities for case-based learning that complements the more time-limited and episodic teaching cases which rarely provide learners with a longitudinal perspective of nonprofit organizations. This book was originally published as a special issue of the *Journal of Evidence-Based Social Work*. *Lemon-Aid New Cars and Trucks 2011* Haynes Publications Womack and Jones deconstruct the broken producer-consumer model and show businesses how to repair it, by providing the full value consumers desire from products without wasting time or effort. Why is it that, when our computers or our cell phones fail to satisfy our needs, virtually every interaction with help lines, support centers, or any organization providing service is marked with wasted time and extra hassle? In their bestselling business classic *Lean Thinking*, James Womack and Daniel Jones introduced the world to the principles of lean production—principles for eliminating waste during production. Now, in *Lean Solutions*, the authors establish the groundbreaking principles of lean consumption, showing companies how to eliminate

inefficiency during consumption. Lean Solutions is full of surprising success stories: Fujitsu, a leading service company for technology, has transformed the way call centers solve problems—learning how to eliminate the underlying cause of current problems rather than fixing them again and again. An extremely successful car dealership has adopted lean principles to streamline its business, making for dramatically reduced wait time, fewer return trips, and greater

satisfaction for customers—and a far more lucrative enterprise. Lean Solutions will inspire managers to take the first steps toward perfecting their company's process of giving consumers what they really want.
