Based on the civilian WL model,
Harley-Davidson's WLA ("A" for
"Army") motorcycle was first
produced in 1940. It would
remain in production through
1945, and eventually over
90,000 weredelivered for use in
all theaters of WWII. Like the
WL, the WLA was equipped with a
45 cubic inch (740 cc) flathead
high compression engine and
arugged frame. Military
modifications included blackout
lights, fenders without
traditional sides (to reduce
mud clogging), an air cleaner
to facilitate off-road use and
easy maintenance, and a
crankcase breather that enabled
the fording of water obstacles.
The motorcycle typically was
also equipped with leg
protectors, a skid plate,

leather rifle or machine gun
scabbard, an ammunition box,
radio or luggage rack, and a
windscreen. This U.S. Army
technical manual TM 9-879 was
created in 1943 for the men who
operated and serviced the WLA
in the field. In its pages you
will find a description of the
motorcycle, and information
regarding its use and
