Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in

America, Incorporated Energy Independence is the essential guide to the most viable and affordable alternative energy solutions for the everyday consumer—including solar panels, wind generators, hydrogen fuel cells, wood, hydro-electric, geothermal heat pumps, and more. For all those seeking either to supplement their traditional fuel-burning furnace or to revamp their home, this book has what they need to get started. They ' ll learn about the most progressive and advanced options as well as tried and true energy conservation techniques. They ' ll learn how much each method costs, and how quickly they will recoup any investment. Also including a chapter on alternative-fuel cars, this book has been revised and updated with the most recent stats, technology, costs, and advice. It is a must for anyone—urbanite, suburbanite, or rural dweller—who relies on traditional oil-burning sources but has decided it ' s high time to be proactive both about cutting fuel costs and achieving freedom from fossil fuel dependence. For All Practical Purposes Dundurn This Round Table investigates the effectiveness and costs of various mitigation options in road transport, and discusses the distribution of

abatement efforts across sectors of the economy.

"This book is an introduction to automotive technology, with specific reference to battery electric, hybrid electric, and fuel cell electric vehicles. It could serve electrical engineers who need to know more about automobiles or automotive engineers who need to know about electrical propulsion systems. For example, this reviewer, who is a specialist in electric machinery, could use this book to better understand the automobiles for which the reviewer is designing electric drive motors. An automotive engineer, on the other hand, might use it to better understand the nature of motors and electric storage systems for application in automobiles, trucks or motorcycles. The early chapters of the book are accessible to technically literate people who need to know something about cars. While the first chapter is historical in nature, the second chapter is a good introduction to automobiles, including dynamics of propulsion and braking. The third chapter discusses, in some detail, spark ignition and compression ignition (Diesel) engines. The fourth chapter discusses the nature of transmission systems." —James Kirtley, Massachusetts Institute of

Technology, USA "The third edition covers extensive topics in modern electric, hybrid electric, and fuel cell vehicles, in which the profound knowledge, mathematical modeling, simulations, and control are clearly presented. Featured with design of various vehicle drivetrains, as well as a multi-objective optimization software, it is an estimable work to meet the needs of automotive industry." —Haiyan Henry Zhang, Purdue University, USA
"The extensive combined experience of the authors have produced an extensive volume covering a broad range but detailed topics on the principles, design and architectures of Modern Electric, Hybrid Electric, and Fuel Cell Vehicles in a well-structured, clear and concise manner. The volume offers a complete overview of technologies, their selection, integration & control, as well as an interesting Technical Overview of the Toyota Prius. The technical chapters are complemented with example problems and user guides to assist the reader in practical calculations through the use of common scientific computing packages. It will be of interest mainly to research postgraduates working in this field as well as established academic researchers, industrial R&D engineers and allied professionals." —Christopher Donaghy-Sparg, Durham University, United Kingdom
The book deals with the fundamentals, theoretical bases, and design methodologies of conventional internal combustion engine (ICE) vehicles, electric vehicles (EVs), hybrid electric vehicles (HEVs), and fuel cell vehicles (FCVs). The design methodology is described in mathematical terms, step-by-step, and the topics are approached from the

overall drive train system, not just individual components. Furthermore, in explaining the design methodology of each drive train, design examples are presented with simulation results. All the chapters have been updated, and two new chapters on Mild Hybrids and Optimal Sizing and Dimensioning and Control are also included • Chapters updated throughout the text. • New homework problems, solutions, and examples. • Includes two new chapters. • Features accompanying MATLAB™ software.

When Lexus launched fifteen years

ago, the idea of a Japanese brand

that would compete fender to

fender with Mercedes-Benz, BMW,

and Cadillac seemed preposterous.

But Lexus' first sedan shocked the

world. The result of hundreds of

prototypes, the work of more than

1,000 engineers, and some \$1

billion, the Lexus LS 400 pioneered

new ground. Within just a few years,

Lexus had transformed itself from

an unlikely outsider into one of the

industry's leaders as it redefined

the idea of the luxury vehicle while

also building a dealer network that

gave unprecedented attention to

service. The Lexus Story describes

the brand's rapid ascent-and its

travails along the way. The Lexus

Story is the first journalistic telling

of the history of this extraordinary

company. And it is the only account

afforded full access to the

designers, engineers, dealers, and

company leaders who molded the

cars and the brand. The Lexus Story

takes readers deep inside the

making of first-class automobiles,

from the creative sparks kindled in Lexus' far-flung design studios to the engineering refinements that translate ideals of performance and luxury into steel, glass, and rubber. Designed to be both readable and visually welcoming with more than 200 full-color photographs, *The Lexus Story* is a compelling history of a world-class brand.

The Geography of Bliss membawa pembaca melanglangbuana ke berbagai negara, dari Belanda, Swiss, Bhutan, hingga Qatar, Islandia, India, dan Amerika ... untuk mencari kebahagiaan. Buku ini adalah campuran aneh tulisan perjalanan, psikologi, sains, dan humor. Ditulis tidak untuk mencari makna kebahagiaan, tapi di mana. Apakah orang-orang di Swiss lebih bahagia karena negara mereka paling demokratis di dunia? Apakah penduduk Qatar, yang bergelimang dolar dari minyak mereka, menemukan kebahagiaan di tengah kekayaan itu? Apakah Raja Bhutan seorang pengkhayal karena berinisiatif memakai indikator kebahagiaan rakyat yang disebut Gross National Happiness sebagai prioritas nasional? Kenapa penduduk Ashville, Carolina Utara, sangat bahagia? Kenapa penduduk di Islandia, yang suhunya sangat dingin dan jauh dari mana-mana, termasuk negara yang warganya paling bahagia di dunia? Kenapa di India kebahagiaan dan kesengsaraan bisa hidup berdampingan? Dengan wawasan yang dalam dan ditulis

dengan kocak, Eric Wiener membawa pembaca ke tempat-tempat yang aneh dan bertemu dengan orang-orang yang, anehnya, tampak akrab. Sebuah bacaan ringan yang sekaligus memancing pemikiran pembaca. “ Lucu, mencerahkan, mengagumkan. ”

The first book to cover this fast developing field, *Masked Mycotoxins in Food* will provide a full overview of the issues relating to the toxicology of masked mycotoxins present in food products. Mycotoxins are naturally occurring chemicals produced by moulds that can grow on crops and foodstuffs. Masked mycotoxins are modified mycotoxins, due to this modification many cannot be detected using standard analytical techniques, for example HPLC and ELISA, and further research is needed to understand the health risks and threats from these modified compounds. Masked mycotoxin research is an area of toxicological research that has gained significant interest and momentum in recent years. The aim of this book is to provide a full picture of the topic, from the

masked mycotoxin formation in plants to their catabolic fate in humans. The book also provides new insights and will highlight possible gaps in the knowledge base of this relatively new area. Edited and written by World renowned experts working within the field, this book is of interest to toxicologists and biochemists, but also food scientists and agricultural researchers working in industry and academia.

Although there are many good books on the history of Jews in America and a smaller subset that focuses on aspects of Orthodox Judaism in contemporary times, no one, until now, has written an overview of how Orthodoxy in America has evolved over the centuries from the first arrivals in the 17th century to the present. This broad overview by Gurock (Libby M. Klaperman Professor of Jewish History, Yeshiva Univ.; Judaism's Encounter with American Sports) is distinctive in examining how Orthodox Jews have coped with the personal, familial, and communal challenges of religious freedom, economic opportunity, and social integration, as well as uncovering historical reactionary tensions to alternative Jewish movements in multicultural and pluralistic America. Gurock raises penetrating questions about the compatibility of modern culture with pious practices and sensitively explores the relationship of feminism to traditional Orthodox Judaism. There are several excellent reference sources on Orthodox Jews in America,

e.g., Rabbi Moshe D. Sherman's outstanding Orthodox Judaism in America: A Biographical Dictionary and Sourcebook, to which this is an accessible and illuminating companion; recommended not only for serious readers on the topic but for general readers as well. Successful interaction with products, tools and technologies depends on usable designs and accommodating the needs of potential users without requiring costly training. In this context, this book is concerned with emerging ergonomics in design concepts, theories and applications of human factors knowledge focusing on the discovery, design and understanding of human interaction and usability issues with products and systems for their improvement. This book will be of special value to a large variety of professionals, researchers and students in the broad field of

human modeling and performance who are interested in feedback of devices' interfaces (visual and haptic), user-centered design, and design for special populations, particularly the elderly. We hope this book is informative, but even more - that it is thought provoking. We hope it inspires, leading the reader to contemplate other questions, applications, and potential solutions in creating good designs for all.

The Geography of Bliss Macmillan

This volume is about Pope Francis, the diplomat. In his eight years of pontificate, Pope Francis as a peacemaker has propagated the ideas of human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a peaceful journey of human beings. The book analyses his speeches, and

meetings as a diplomat of peace, including his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.
