Did you know that:- Squanto, the Indian who helped the Massachusetts Bay Colony survive, spoke English and had actually made 3 round-trip crossings to Europe before the Pilgrim's 1620 landing at Plymouth Rock ever took place?-The Continental Divide, the imaginary line that divides North America into rivers that flow west from those that flow east, itself divides, forming a large basin in Wyoming where water flows neither in nor out?- Abner Doubleday, the reputed "father of baseball," commanded the artillery at Fort Sumter and thus fired the first Union shot of the Civil War?-The Battle of Hastings was not fought at Hastings?- The ointment Bacitracin gets part of its name from an American girl, Margaret Tracy, who had a leg wound that led to the development of the antibiotic?- Both the largest and the brightest object that you can see with human eye are located in one easy-to-find constellation?This book is, at heart, a glorified trivia book, but describing it that way really sells it just a bit short. Trivia books all too often tend to deal with material that is inherently uninteresting - it's simply trivial. Once you've read some fact in a trivia book, you tend to forget it immediately. While it's clearly an opinion, who, after reading the number of dimples on a golf ball says to himself, "I think I'm going to remember that fact and maybe even tell all of my friends?" This book is a series of short stories, not just a long list of questions and answers with no context. And after reading the stories in this book, people often respond with the very title of the book, as in "Huh. I didn't know that." The stories are organized into sections relating to history, geography, sports, arts and literature, science and technology and the interesting

origins of words and phrases. "Written with a great deal of charm and wit." CreateSpace reviewer

"One of the most acute books about management and how companies work in practice that I have read in a long time. If anyone wants to know exactly how the U.S. auto industry got into trouble, here is your guide." —John Gapper, FINANCIAL TIMES When Bob Lutz got into the auto business in the early 1960s, CEOs knew that if you captured the public's imagination with innovative car design and top-quality craftsmanship, the money would follow. The "car guys" held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put its faith in numbers and spreadsheets. Determined to eliminate the "waste" and "personality worship" of the bygone creative leaders, management got too smart for its own good. With the bean counters firmly in charge, carmakers, and much of American industry, lost their single-minded focus on product excellence and their competitive advantage. Decline soon followed. In 2001, General Motors hired Lutz out of retirement with a mandate to save the company by making great cars again. As vice chairman, he launched a war against the penny-pinching number crunchers who ran the company by the bottom line and reinstated a focus on creativity, design, and cars and trucks that would satisfy GM's customers. Lutz's commonsense lessons, combined with a generous helping of fascinating anecdotes, will inspire readers in any industry.

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. From famed automotive journalist Jason Torchinsky, of Jalopnik and Jay Leno's Garage, comes a witty insider's guide to make sense of self-driving cars and predict the road ahead. Self-driving cars sound fantastical and futuristic and yet they'll soon be on every street in America. Whether it's Tesla's Autopilot, Google's Waymo, Mercedes's Distronic, or Uber's modified Volvos, companies around the world are developing autonomous cars. But why? And what will they mean for the auto industry and humanity at large? In *Robot, Take the Wheel*, Torchinsky gives a colorful account of the development of autonomous vehicles and their likely implications. He encourages us to think of self-driving cars as an entirely new machine, something beyond cars as we understand them today, and considers how humans will get along with these robots that will take over our cars' jobs, what they will look like, what sorts of jobs they may do, what we can expect of them, how they should act,

ethically, how we can have fun with them, and how we can make sure there's still a place for those of us who love to drive, especially with a manual transmission. This vibrant volume explores what's ahead and what we can do now to shape the automated future.

His writing is very thought-provoking, creative and visionary... I would imagine the laws in this book will be very close to the ones Yeshua will set up for the world when He comes to reign... SHIRA SORKO-RAM Pioneer of the Jewish Messianic movement in Israel since 1967 "Trump's *Unfinished Business* will serve as a template for all leaders whether they are in the US, Australia or Korea. I would like to see it made available to voters before major elections. I am really amazed by Steve Cioccolanti's insights into the American cultural war. His coverage of many subjects is very deep. I find the techniques that American leftists use to distort facts and the truth are also used here in South Korea...This book is a great opportunity to problem solvers to learn how God's principles work in human society."
