ney—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The

Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics. "We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish

tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less

than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

100 People Who Are Screwing Up America
Darby Quinn

It has a bone to pick with Cinderella. Burned one too many times by ex-boyfriends, Darby has lost all belief in the happily-ever-after that the fairy-tale princess promised her. She's sworn off love, Prince Charmings, and happy endings and she's happy about it. Really. Or at least she was...until she met Jake, her gorgeous neighbor and the manager of her favorite restaurant. But Darby has rules about dating, ones she's culled from her years spent

with so-called "princes," and starting something with Jake would break all of them. Charming, fun, and unwilling to give up on her, Jake doesn't fit any of the profiles Darby has created from her case studies of ex-princes-gone-bad. Finally presented with her own Prince Charming, can Darby take a chance on a happily-ever-after? Full of wit and sarcastic humor, Cinderella Screwed Me Over by Cindi Madsen proves that sometimes the

perfect love, like a perfect pair of shoes, is just within your grasp. 9 Ways We're Screwing Up Our Girls and How We Can Stop Grand Central Publishing Change your dating game to a winning strategy to find the partner you need with no games, no gambits, and no hiding of who you really are, and what you really want from a mate. Laurel House

believes that "The Rules" of yester-decades don't apply to today's evolved, headstrong, multifaceted women, who are taking longer to wed, often putting careers first and focusing on love and kids later. Screwing the Rules will challenge women to examine their expectations, hopes and dreams,

dating strategy, relationship goals-and themselves- in a revised way. Screwing the Rules is about being honest about who you are and what makes you happy, then making smart decisions about potential compatibility. Laurel speaks not only from the perspective of a professional relationship coach who has helped countless people, but from firsthand experience. She's admittedly made a lot of mistakes in her past relationship s and discusses them candidly. In Screwing the Rules Laurel shares the lessons she's learned along the way. Through seven distinct sections, the book takes the reader full circle. First working on yourself and figuring out what you want in a guy, how to find him, and keep him. It advises when/if/how to let him go, heal, and get out there again. Screwing the Rules is all about helping women bring out their best, most confident,

A lavishly illustrated, witty, and original look at the awesome power of the

political cartoon throughout history to enrage, provoke, and amuse. As a former editor of The New York Times Magazine and the longtime editor of The Nation, Victor S. Navasky knows just how transformative—and incendiary—cartoons can be. Here Navasky guides readers through some of the

greatest cartoons ever created, including those by George Grosz, David Levine, Herblock, Honoré Daumier, and Ralph Steadman. He recounts how cartoonists and caricaturists have been censored, threatened, incarcerated, and even murdered for their art, and asks what makes this art

of artistic expression. **In Defense of Elitism** Simon and Schuster Why is your brother-in-law concerned about the Estate Tax? Why do millionaire news reporters get everything wrong? Why are blood-sucking teachers bankrupting America? Jimmy Dore, the comedy darling of America's

Progressive Left, answers all these questions and more! In this laugh-out-loud collection of essays that are both street-smart and informed, Jimmy sets out to discover what's wrong. Crackling with caustic wit and insight, no aspect of American life is safe from Jimmy's hilarious

scrutiny. He gets to the heart of the issues: why Republicans should support gay marriage or why the President shouldn't have Secret Security until the country has gun control, bringing clarity and hilarity to the incoherent noise of our punditocracy . This outrageously entertaining manifesto is an excellent resource for those who have survived long arguments during family dinners. And in a media environment dominated by corporate interests, Jimmy's take-no-prisoners approach is fearless: going after both political parties, and all corners of mainstream news. A David against an army of Goliaths. Equal measures of silliness and spleen-venting, Your Country Is Just Not That Into You is the most oddly uplifting political book of the year. Shakedown Penguin A "brilliant" (The Washington Post), "clear-eyed and incisive" (The New Republic) analysis of how the wealthiest

group in American society is making life miserable for everyone—including themselves. In 21st-century America, the top 0.1% of the wealth distribution have walked away with the big prizes even while the bottom 90% have lost ground. What's left of the American Dream has taken refuge in the 9.9% that lies just below the tip of

extreme wealth. Collectively, the members of this group control more than half of the wealth in the country—and they are doing whatever it takes to hang on to their piece of the action in an increasingly unjust system. They log insane hours at the office and then turn their leisure time into an excuse for more career-building, even as they

Award-winner Bernard Goldberg earned a reputation as one of the preeminent reporters in the television news business. When he looked at his own industry, however, he saw that the media far too often ignored their primary mission: objective, disinterested reporting. Again and again he saw that they slanted the news to the left. For years Goldberg appealed to reporters, producers, and network executives for more balanced

reporting, but no one listened. The liberal bias continued. In this classic number one New York Times bestseller, Goldberg blew the whistle on the news business, showing exactly how the media slant their coverage while insisting they're just reporting the facts.

As lead guitarist of the Rolling

Stones, Keith Richards created the riffs, the lyrics, and the songs that roused the world. A true and towering original, he has always walked his own path, spoken his mind, and done things his own way.
