Economic Cycles and Social Movements: Past, Present and Future offers diverse perspectives on the complex interrelationship between social challenges and economic crises in the Modern World System. Written with a balance of quantitative, qualitative and theoretical contributions and insights, this volume provides a great opportunity to reflect upon the ongoing conceptual and empirical challenges when confronting the complex interrelations of various economic cycles and social movements. By engaging wide-ranging ideas and theoretical points of view from different disciplines, different countries and different perspectives, this study breaks new ground and offers novel insights into the way the capitalist world economy functions as well as the way social and political movements react to these constraints. Different chapters in this volume bring about novel interdisciplinary approaches to study business cycles, economic changes and social as well as political movements, offer new interpretations and, while examining the complexity of socioeconomic cycles in the long run, present epistemological challenges and a wide variety of empirical data that will increase our understanding of these complex interactions.

This book analyses the Association of Southeast Asian Nations (ASEAN) as a powerful actor in International Relations by examining how the ASEAN

community has evolved, looking specifically at its relationship with the EU with regards to human rights. The book adds to important contemporary debates within constructivist theory, shedding light on the need for 'critical' constructivism that emphasises language and contestation and what that may entail. On an empirical level, it challenges the idea of an 'EU-centrism,' demonstrating how ASEAN is the major driving force behind its human rights and community aspirations, as well as within the ASEAN-EU relationship. Furthermore, this book engages with the introspection surrounding constructivism by addressing the trouble with 'norms,' and instead unpacking the relationship between ASEAN and the EU to show language power in play. In particular, the book looks at how language, or rather coercive language, helps us 'see' contestation in action, something that researchers sympathetic towards the idea of ASEAN's 'resistance' have been unable to show through a focus on norms. Tracing the evolution of the ASEAN community and human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights.

An updated look at global trade and why it remains as controversial as ever Free trade is always under attack, more than ever in recent years. The imposition of numerous U.S. tariffs in 2018, and the retaliation those tariffs have drawn, has thrust trade issues to the top of the policy agenda. Critics contend that free trade brings economic pain, including plant closings and worker layoffs, and that trade agreements serve corporate interests, undercut domestic environmental regulations, and erode national sovereignty. Why are global trade and agreements such as the Trans-Pacific Partnership so controversial? Does free trade deserve its bad reputation? In Free Trade under Fire, Douglas Irwin sweeps aside the misconceptions that run rampant in the debate over trade and gives readers a clear understanding of the issues involved. In its fifth edition, the book has been updated to address the sweeping new policy developments under the Trump administration and the latest research on the impact of trade.
