Classical guitarists---both students and professional performers---require the same high-quality editions that their pianist colleagues have come to expect from Alfred Music. Our Classical Guitar Masterworks Editions continue the Alfred Music tradition of providing carefully edited, beautifully presented music for practice and performance. This edition of J. S. Bach's masterpieces for solo violin, artfully transcribed for classical guitar by renowned performer, recording artist, and pedagogue Nicholas Goluses, is an essential addition to any classical guitarist's library. Including a thoughtful, scholarly preface on the art of transcribing Bach for the guitar, drawn from Goluses' doctoral dissertation, studying this edition will be edifying for any serious classical guitarist. Goluses' approach to putting these pieces on the guitar, and his thoughtful fingerings, will help overcome the complexities of playing this important and challenging music.

What is it about the top tech product companies such as Amazon, Apple, Google, Netflix and Tesla that enables their record of consistent innovation? Most people think it's because these companies are somehow able to find and attract a level of talent that makes this innovation possible. But the real advantage these companies have is not so much who they hire, but rather how they enable their people to work together to solve hard problems and create extraordinary products. As legendary Silicon Valley coach--and coach to the founders of several of today's leading tech companies--Bill Campbell said, "Leadership is about recognizing that there's a greatness in everyone, and your job is to create an environment where that greatness can emerge." The goal of EMPOWERED is to provide you, as a leader of product management, product design, or engineering, with everything you'll need to create just such an environment. As partners at The Silicon Valley Product Group, Marty Cagan and Chris Jones have long worked to reveal the best practices of the most consistently innovative companies in the world. A natural companion to the bestseller INSPIRED, EMPOWERED tackles head-on the reason why most companies fail to truly leverage the potential of their people to innovate: product leadership. The book covers: what it means to be an empowered product team, and how this is different from the "feature teams" used by most companies to build technology products recruiting and coaching the members of product teams, first to competence, and then to reach their potential creating an inspiring product vision along with an insights-driven product strategy translating that strategy into action by empowering teams with specific objectives—problems to solve—rather than features to build redefining the relationship of the product teams to the rest of the company detailing the changes necessary to effectively and successfully transform your organization to truly empowered product teams EMPOWERED puts decades of lessons learned from the best leaders of the top technology companies in your hand as a guide. It shows you how to become the leader your team and company needs to not only survive but thrive.

2011 Reprint of 1924 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. Smith Wigglesworth (1859-1947), was a British evangelist who was important in the early history of Pentecostalism. Wigglesworth believed that healing came through faith, and he was flexible about the methods he employed. When he was forbidden to lay hands on audience members by the authorities in Sweden, he preached for a "corporate healing," by which people laid hands on themselves. He also practiced anointing with oil, and the

distribution of prayer handkerchiefs. Wigglesworth sometimes attributed ill-health to demons. Wigglesworth claimed that God had healed him of appendicitis and much of his ministry was focused on faith healing. There were many miracles attributed to him, some reported in the popular press and in Pentecostal magazines such as 'Confidence' which had been founded by Boddy. Wigglesworth avoided all medical treatment, despite suffering from kidney stones in his later years. These eventually passed naturally. He refused any surgical procedure, and stated that no knife would ever touch his body either in life or death.

The demands of modeling and computation in engineering are rapidly growing as a multidisciplinary area with connections to engineering, mathematics and computer science. Modeling and Computation in Engineering III contains 45 technical papers from the 3rd International Conference on Modeling and Computation in Engineering (CMCE 2014, 28-29 June 2014, including 2014 Hydraulic Engineering and Environment Workshop, HEEW 2014). The conference serves as a major forum for researchers, engineers and manufacturers to share recent advances, discuss problems, and identify challenges associated with modeling technology, simulation technology and tools, computation methods and their engineering applications. The contributions showcase recent developments in the areas of civil engineering, hydraulic engineering, environmental engineering and systems engineering, and other related fields. The contributions in this book mainly focus on advanced theories and technology related to modeling and computation in civil engineering, hydraulic structures, hydropower and management, coastal reclamation and environmental assessment, flood control, irrigation and drainage, water resources and water treatment, environmental management and sustainability, waste management and environmental protection, pollution and control, geology and geography, mechanics in engineering, numerical software and applications. Although these papers represent only modest advances toward modeling and computation problems in engineering, some of the technologies might be key factors in the success of future engineering advances. It is expected that this book will stimulate new ideas, methods and applications in ongoing engineering advances. Modeling and Computation in Engineering III will be invaluable to academics and professionals in civil engineering, hydraulic engineering and environmental engineering.

Teachers are simply the best. They're the special breed of people who

strive to infuse us with an appreciation for the miraculous world in which we live and a sincere passion for learning. What better way to sing their praises than by declaring more than a thousand great things about them? That's what the successful author trio of Birnbach, Hodgman, and Marx does in this fourth book of their highly successful 1,003 Great Things series. This wonderfully humorous book features entries such as: o They are as happy about Friday as you are. o They tend to have highly legible handwriting. o Who else knows how important it is to be line leader? o They are excellent spellers. o Teachers know about Roman numerals. o They are more afraid of the principal than you are. o They lend you milk money when you forget yours. o They're not in it for the money.

Hodgman . . . [brings her] signature quirky but acceptably outrageous perspective to contemporary American lifestyles and customs." -The Oklahoman * Keep those AARP cards at home, avoid three-way mirrors like the plague, and for goodness' sake, no more groaning. * Extend that youthful longevity with the tenth title in the successful 1,003 series. BOTOX, laser-peels, antiwrinkle creams-an estimated 90 million Americans over the age of 45 are looking for the fountain of youth wherever they can find it. Ann Hodgman offers 1,003 youthful approaches to turn back the hands of time, including: * It's never too late to start using sunscreen. And, if it is too late for that, it's really never too late to get a peel. * Never admit you don't know how to use your iPod. * Keep the news that you take Lipitor to yourself. * "I refuse to admit that I am more than 52, even if that makes my children illegitimate." -Lady Nancy Astor
