Chances are, you ' re already a Web user and use the Internet on a regular basis. You ' ve probably seen a few impressive Web sites and now you ' re inspired to create a Web page of your own, but you ' re not sure where to start. The answer is: right here! Creating Web Pages For Dummies guides you through the process of making your own Web pages without hassle or

confusion. This straightforward book shows you just how easy it is to launch a site, specialize a page, making your site interactive, and much more! In no time you will become a pro in: Web publishing basics Geocities, Google page creator, and AOL Web publishing Using Flickr, creating blogs, and selling products on eBay HTML and other handy tools to “beef up” your site Writing and formatting Web text Creating and adding graphics for your site Adding links, animation, and multimedia Designing a great-looking, complete Web site Besides getting to know the ins and outs of building a Web page, this guide offers suggestions on Web publishing, ranging from testing out your Web site and advertising your site to legal permission and displaying borrowed content. This resourceful guide also includes Web lingo worth knowing and a quick guide to HTML tags, which points out some lesser known but nevertheless useful tags. Now in its 8th edition, *Creating Web Pages For Dummies* will help make your Web page stand out in the crowd! InfoWorld Association for Talent Development

With *Beginning Android Web Apps Development*, you'll learn how to apply HTML5, CSS3, JavaScript, Ajax and other Web standards for use on the Android mobile platform, by building a variety of fun and visually stimulating games and other web applications! If you've done some basic web development, and you want to build your skills to create exceptional web apps, you'll find everything you seek in the discussions and examples in this book. Each application you'll build in *Beginning Android Web Application Development* will show you solutions that you can apply to many of your own projects. Each example shares techniques and coding solutions that will inspire your own work. You'll learn how to tie your Android apps into Twitter through two apps that you'll build: *Who's that Tweet?!*, a quiz game based on celebrity accounts, and *I Love Ham*, a coding investigation into search phrases and rhyming. Your Android web app

development skills will then proceed in another direction, as you discover the power of HTML5 in two game apps: *Scavenger Hunt*, which introduces you to the HTML5 GPS location API, and *Spies!*, a location-based application that shows you how to use CSS3, Ajax, and HTML5 within multi-player environments. You'll also create an Android web application which checks the arrival time of buses and light-rails through the use of Portland, Oregon's open Tri-Met data API! This app is a great template for other apps you may want to build in the future, and showcases the important techniques for incorporating cloud-based apps into web games. After reading *Beginning Android Web Apps Development*, you will have built real apps and developed along the way the skills you'll need to create highly interactive, professional web applications... and, your journey will be engaging and enjoyable! *Beginning Web Programming with HTML, XHTML, and CSS Apress* InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.
