The 22q11.2 deletion syndrome, also known as velo-cardio-facial syndrome and DiGeorge syndrome, is relatively new. The genetic test to determine if a child has it has only been available since 1994.

Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition, effectively blends the thoughtful research that has transpired within the past 25 years with practical and current educational strategies to better meet the needs of children with the 22q11.2 deletion syndrome and

other developmental disabilities.

With its expanded content, as well as new contributions from some of the most highly regarded experts in the field, Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition is an essential resource for teachers, parents, physicians, and therapists of children with this complicated learning profile. To first address the scientific information that is needed to understand the syndrome and the implications of current research, expert contributors present the results of current studies involving brain

abnormalities, language/learning profiles, medical needs, and psychiatric and behavioral difficulties. These valuable chapters are written in a reader-friendly manner to help parents, professionals, and teachers gain useful and necessary comprehension of the unique characteristics of the 22q11.2DS population. The second part of the book is a practical guide to educating a child with 22q11.2DS from birth through adulthood. Divided into the various stages of development from preschool to adulthood, it includes information regarding the necessary tests

special education teams should run, typical difficulties associated with learning, changes that occur with ability as the child matures, and behavioral problems in the school setting. New to the Third Edition: *

- Addition of recent research studies since 2012
- * Current research and treatment options for mental health issues
- * Expanded and enhanced coverage of bullying and the social/emotional aspects of the syndrome
- * Discussion on the possibility of cognitive decline and how to address this at school
- * More information on Common Core State Standards and standardized testing for children with disabilities,

including a section on understanding test scores * Homeschooling and other placement alternatives * Executive functioning deficits, their impact in the classroom, and approaches to use * Dealing with problem behaviors such as withdrawal and school refusal * Cognitive remediation and new treatment strategies * New math and reading remediation techniques * New options for programming and post-secondary placements

In this extended meditation, Jean Lave interweaves analysis of the process of apprenticeship among the Vai and Gola tailors of Liberia with reflections on the evolution of her research on those tailors in the late 1970s. In so doing, she provides both a detailed account of her apprenticeship in the art of sustained fieldwork and an insightful overview of thirty years of changes in the empirical and theoretical facets of ethnographic practice. Examining the issues

she confronted in her own work, Lave shows how the critical questions raised by ethnographic research erode conventional assumptions, altering the direction of the work that follows. As ethnography takes on increasing significance to an ever widening field of thinkers on topics from education to ecology, this erudite but accessible book will be essential to anyone tackling the question of what it means to undertake critical and conceptually challenging fieldwork.

Apprenticeship in Critical Ethnographic Practice explains how to seriously explore what it means to be human in a complex world—and why it is so important.

Dyslexia is a specific learning difficulty that hinders the learning of literacy skills. This problem with managing verbal codes in

memory is neurologically based and tends to run in families. Other symbolic systems, such as mathematics and musical notation, can also be affected. Dyslexia can occur at any level of intellectual ability. It can accompany, but is not a result of, lack of motivation, emotional disturbance, sensory impairment or meagre opportunities. The effects of dyslexia can be alleviated by skilled specialist teaching and committed learning. Moreover many dyslexic people have visual and spatial abilities which enable them to be successful in a wide range of careers. The appearance of this book .. is to be welcomed. It represents a full statement of the best practice to be found in the many kinds of intervention that are conducted with dyslexic students. It addresses some fundamental questions that are seldom asked and much of

what the skilled teacher knows and does is set down here in print for the first time. From the Preface: 'Collectively, the chapters provide a synthesis of current practice focusing on how to assess and treat the symptoms of dyslexia, guided by a proper understanding of the cognitive and linguistic weaknesses that underpin the condition. The book makes clear that the backbone of intervention for dyslexia is a highly structured multisensory approach that teaches reading and spelling skills at the appropriate rate. However, it is also explicit in pointing out that such a programme must be delivered with due attention to individual differences in the other cognitive skills that contribute to literacy development, and take account of the learner's style, interests and not least their confidence and self-esteem. This

book provides an important resource for teachers who wish to become competent in the skills required for the assessment, teaching, supporting and counselling of dyslexic people in a variety of settings. It promises to reach many teachers and in turn, their students and families'. Margaret J. Snowling, University of York, UK
