**Adaptive Mobile Computing: Advances in Processing Mobile Data Sets** explores the latest advancements in producing, processing and securing mobile data sets. The book provides the

elements needed to deepen understanding of this trend which, over the last decade, has seen exponential growth in the number and capabilities of mobile devices. The pervasiveness, sensing capabilities and computational power of mobile devices have turned them into a fundamental instrument in everyday life for a large part of the human population. This fact makes mobile devices an incredibly rich source of data about the dynamics of human behavior, a pervasive wireless sensors network

with substantial computational power and an extremely appealing target for a new generation of threats. Offers a coherent and realistic image of today's architectures, techniques, protocols, components, orchestration, choreography and development related to mobile computing. Explains state-of-the-art technological solutions for the main issues hindering the development of next-generation pervasive systems including: supporting components for collecting data intelligently, handling resource and data

management, accounting for systems fault tolerance, security, monitoring and control, addressing the relation with the Internet of Things and Big Data and depicting applications for pervasive context-aware processing. Presents the benefits of mobile computing and the development process of scientific and commercial applications and platforms to support them. Familiarizes readers with the concepts and technologies that are successfully used in the implementation of pervasive/ubiquitous

Since its introduction in 1975, the BMW 3-series has earned a reputation as one of the world's greatest sports sedans. Unfortunately, it has also proven one of the more expensive to service and maintain. This book is dedicated to the legion of BMW 3-series owners who adore their cars and enjoy restoring, modifying, and maintaining them to

---

perfection; its format allows more of these enthusiasts to get out into the garage and work on their BMWs- and in the process, to save a fortune. Created with the weekend mechanic in mind, this extensively illustrated manual offers 101 projects that will help you modify, maintain, and enhance your BMW 3-series sports sedan. Focusing on the 1984-1999 E30 and E36 models, 101

Performance Projects for Your BMW 3-Series presents all the necessary information, covers all the pitfalls, and assesses all the costs associated with performing an expansive array of weekend projects. Fundamentals of Adhesion and Interfaces Haynes Manuals N. America, Incorporated "not a bad apple" is a story about apples growing on a tree in an apple orchid who one day realize they are very gifted and talented

fruit getting ready for the market. One apple grows up after the apples realize they can talk and tells the other apples he is a bad apple and wants to go with the other bad ones. How all the good apples deal with this apples is old fashion logic and the outcome is precious. equipment, analytical tools such as the nanoindenter, SIMS, and ESCA, and improvements in computing technology have greatly expanded the relevant body of knowledge. Rapid progress in adhesion and interfacial science has made dissemination of results in a timely fashion more important than ever.

Accordingly, the editors of this book organized an ACS symposium, sponsored by the Division of Polymer Chemistry, entitled *Fundamentals of Adhesion and Interfaces*. The papers in this volume were selected from those

presented at the symposium. *2001 MDX Service Manual* Penguin  
This volume, part of Prentice Hall's *Multimedia Series in Automotive Technology*, contains the following features: -- CD-ROM with live action video, animation test bank questions with answers, scope waveform library, and a comprehensive glossary. -- Free access to a website with ASE-type questions allows readers to study for the ASE tests at their own

pace. -- A worktext with more than 100 lab sheets. -- The use of photo sequences throughout this book.

Ulli Steltzer, a distinguished photographer, takes the reader into the carving shed and studio to see Robert Davidson as he creates both monumental poles and intricately detailed powerful masks. More than 100 of her black-and-white photographs, reproduced in duotone, record both the evolution of Davidson and his art, from

---

the early days up to the present, a span of 25 years. In the accompanying text and captions, Robert Davidson writes movingly about growing up Haida and his development as an artist, describes the creative and practical process of carving poles and masks, and discusses the place of art in Haida culture. An introduction by Aldona Jonaitis assesses Robert Davidson's place in the world of art. Robert Davidson has produced an internationally acclaimed body of art, in particular a number of large totem poles and masks in collections in

Canada and the United States, including the Southwest Museum in Los Angeles, the National Gallery of Canada, the Canadian Museum of Civilization, and the Vancouver Art Gallery. Children's Saving Psychology Press "In order to highlight this "child-centred" approach, the authors studied the way children tackle the particular problems posed by limitations of income. How do children learn (a) the relationship between choices available in the present

and the future, (b) to spread their limited financial resources over time into the future and (c) about the strategies, such as banking, that allow them to protect those resources from threats and temptations? In short, how do children learn to save?" "This volume goes some way to answering these and related questions and in so doing sets up an alternative framework for the study of the emergence of economic awareness. In addition,

"This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the

failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future." —Ralph Nader, Consumer Advocate  
This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving

computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages

has affected the theory and practice of the engineering and operations of aircraft and spacecraft from 1945 to the present. Paul Ceruzzi points out that the "revolution" in aerospace technology has been going on for at least forty years. For the first time, he tells how modern flight depends on computers, how this came about, and what its consequences are. He brings to light new facets of the individual stories of aerospace and computing, while also revealing more general themes about the dynamics and evolution of these modern technologies.

Spacecraft and fighters make use of leading-edge computer technologies in their design, testing manufacture, navigation and operation; moreover pilots and astronauts rely on computer simulations throughout their training. Ceruzzi describes these technologies and their history. In separate chapters he focuses on Northrop ("midwife of the computer industry"), missile tracking, Whirlwind, Apollo, Minuteman, and the software involved. An appendix discusses the role that on-board and ground computers played in the

explosion of the space shuttle "Challenger. Paul Ceruzzi is Associate Curator at the National Air and Space Museum of the Smithsonian Institution. When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted

industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of

color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

Atlas at War! collects  
fifty hard-hitting

stories from Atlas  
Comics, the company  
that became Marvel  
Comics and published  
more war titles than  
anyone in the industry  
between the years 1951  
and 1960. Comics  
historian Dr. Michael J.  
Vassallo has chosen the  
best of the best, many  
of which are coming  
back into print for the  
first time, from sixteen  
different Atlas war  
titles and featuring the  
artwork of twenty  
different artists--giants

of the genre, including  
Russ Heath, John  
Severin, Bernie  
Krigstein, Joe Maneely,  
Jerry Robinson, Steve  
Ditko, and Jack Kirby.  
Each page has been  
meticulously restored  
from its first printing by  
comic art restorer Allan  
Harvey. Atlas at War!  
covers the brutal pre-  
code period where  
graphic depictions of  
war action were  
rendered by artists who  
were World War II  
veterans themselves, as

---

well as the post-code period, where code restrictions forced creators to tell stories without graphic violence but produced some of the most beautiful comic art of the genre. In addition to the artists, stories cover all aspects of war--from famous campaigns, weaponry, and personal soldier stories to political topics, Nazi atrocities, and even one story tinged with pre-code horror! Often

overlooked in favor of its competitors, Atlas at War! will finally show that Atlas' war titles were second to no one. Toward Speaking Excellence Covers all U.S. and Canadian models of Honda Pilot (2003 through 2007) and Acura MDX (2001 through 2007) Cost/schedule Control Systems Criteria (joint Implementation Procedures).
