Britain went to war to force China to import thousands of tons of opium, to cripple and impoverish that nation. The Opium Wars never really ended. The U.S., like China, was too great for the London money lords to occupy by force. One way America is being brought to heel is by the drug trade. Crime and other social problems in the U.S. and Mexico are massively influenced by drugs and drug dealing. Illicit drugs may now account for as much as \$1 trillion annually in financing for criminal activity and corruption. TOPICS: The East India Company; British role in the drug trade, from the wars on China, the HongShanghai Bank, Bronfmans, Prohibition, and Organized Crime in the U.S. Financial derivatives; Wall St., money laundering; medical marijuana. decriminalization; Soros and IMF links to drugs. Afghan opium; Colombian cartel; terrorism. Russia targeted by Dope, Inc. cocaine, heroin, amphetamines. More than 30 years have passed since the first edition of Dope, Inc. was published, in 1978. Commissioned by Lyndon Larouche, it threatened the world's power structure. It became America's underground best-seller. Dope, Inc. drew the line between American patriots and the British apparatus destroying the USA. The London and Wall Street

bankers ran for cover. A mammoth campaign of slander and government dirty tricks tried to bury the authors, because Dope, Inc. revealed the most deeply held secrets of the big names behind the world's illegal narcotics trade. In Venezuela, the leading drug-running families who were exposed in the Spanish-language version, *Narcotrafico, S.A.*, used their political influence to have it banned and confiscated. Financiers scrambled to control the damage of this unprecedented exposure. The Hongkong and Shanghai Banking Corporation was denied a license in New York State because it failed to refute the charges in *Dope, Inc.*, when the state demanded accounting of its hidden profits, silent subsidiaries, and paraphernalia of money-laundering. Now in 2010, *Dope, Inc.* is completely updated: Soros - Afghanistan - the government and bankers behind the cartels. Today the British-controlled dope trade finances the world's leading terrorist entities - Afghanistan's Taliban, the Chechen rebels, the FARC guerrillas of Colombia. Dope money supports the bankrupt world financial system. A trillion dollars goes through the Cayman Islands, the Isle of Man, Dubai. Speculation makes it trillions more. It sucks the blood of the real economy; and the dope destroys mankind's powers of reason.

Computers and flying machines are two dominant technologies of our time. "Beyond the Limits" shows the ways in which they interact, clearly illustrating the complex issues and devices involved in their mutual evolution. It describes and illustrates how computer technology has affected the theory and practice of the engineering and operations of aircraft and spacecraft from 1945 to the present. Paul Ceruzzi points out that the "revolution" in aerospace technology has been going on for at least forty years. For the first time, he tells how modern flight depends on computers, how this came about,

and what its consequences are. He brings to light new facets of the individual stories of aerospace and computing, while also revealing more general themes about the dynamics and evolution of these modern technologies. Spacecraft and fighters make use of leading-edge computer technologies in their design, testing manufacture, navigation and operation; moreover pilots and astronauts rely on computer simulations throughout their training. Ceruzzi describes these technologies and their history. In separate chapters he focuses on Northrop ("midwife of the computer industry"), missile tracking, Whirlwind, Apollo, Minuteman, and the software involved. An appendix discusses the role that on-board and ground computers played in the explosion of the space shuttle "Challenger. Paul Ceruzzi is Associate Curator at the National Air and Space Museum of the Smithsonian Institution. "Beyond the Limits" was written to accompany the opening of a major new gallery devoted to the subject at the Smithsonian's National Air and Space Museum.

When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and

includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

Ulli Steltzer, a distinguished photographer, takes the reader into the carving shed and studio to see Robert Davidson as he creates both monumental poles and intricately detailed powerful masks. More than 100 of her black-and-white photographs, reproduced in duotone, record both the evolution of Davidson and his art, from the early days up to the present, a span of 25 years. In the accompanying text and captions, Robert Davidson writes movingly about growing up Haida and his development as an artist, describes the creative and practical process of carving poles and masks, and discusses the place of art in Haida culture. An introduction by Aldona Jonaitis assesses Robert Davidson's place in the world of art. Robert Davidson has

Unlikely couples, matchmakers, and moral dilemmas are the heart of the Best Intention series, a collection of novellas set in a business environment where negotiations and deals turn personal... The Sweetest Deal is Book One in this series. Ian Woodford is about to close the most important business transaction of his life and realize his father's dream—all he has to do is agree to one request: give the man who's controlling the deal a grandchild. The proposition is every level of wrong, but an arrangement like this would honor his father's memory, and while Ian can never replace the child he lost, it would give him an opportunity for another child, this time without the encumbrance of a wife. But the more time he spends with C.C., the more he

---

realizes he wants her for more than a way to get a deal and a child... C.C. aka Catherine Crowell gave up on dreams of a family after Mr. Worse-Than-Wrong broke her heart. Hiding behind spreadsheets, and oversized suits, she's determined to show her business-mogul father she's capable of taking over his company and won't be fooled by smooth talking liars again. Her work has become her life, and while she'd love a child, that's not going to happen. When Ian Woodford, the company's newest business partner, shows interest in her, C.C.'s more than a little suspicious, and determined to find out if his intentions are real, and what she plans to do about it if they are...or aren't. It's going to get messy and once the truth come out, as it always does, it's going to take more than one matchmaker to get the sweetest deal. BONUS: Included with this ebook is the first chapter of Strangers Like Us, Book 1 of the Reunion Gap series.

*DOPE, INC. Britain's Opium War Against the World* Cengage Learning "In order to highlight this "child-centred" approach, the authors studied the way children tackle the particular problems posed by limitations of income. How do children learn (a) the relationship between choices

available in the present and the future, (b) to spread their limited financial resources over time into the future and (c) about the strategies, such as banking, that allow them to protect those resources from threats and temptations? In short, how do children learn to save?" "This volume goes some way to answering these and related questions and in so doing sets up an alternative framework for the study of the emergence of economic awareness. In addition, commentaries by Anna E. Berti (Chapter 7) and Sharone L. Maital and Shlomo Maital (Chapter 8) explore these issues further."--BOOK JACKET.

"This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future."  
-Ralph Nader, Consumer Advocate  
This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks).

Atlas at War! collects fifty hard-hitting stories from Atlas Comics, the company that became Marvel Comics and published more war titles than anyone in the industry between the years 1951 and 1960. Comics historian Dr. Michael J. Vassallo has chosen the best of the best, many of which are coming back into print for the first time, from sixteen different Atlas war titles and featuring the artwork of twenty different artists--giants of the genre, including Russ Heath, John Severin, Bernie Krigstein, Joe Maneely, Jerry Robinson, Steve

---

Ditko, and Jack Kirby. Each page begins to discover that the has been meticulously restored from its first printing by comic art restorer Allan Harvey. Atlas at War! covers the brutal pre-code period where graphic depictions of war action were rendered by artists who were World War II veterans themselves, as well as the post-code period, where code restrictions forced creators to tell stories without graphic violence but produced some of the most beautiful comic art of the genre. In addition to the artists, stories cover all aspects of war--from famous campaigns, weaponry, and personal soldier stories to political topics, Nazi atrocities, and even one story tinged with pre-code horror! Often overlooked in favor of its competitors, Atlas at War! will finally show that Atlas' war titles were second to no one.
