Protecting the reproductive potential of young patients undergoing cancer therapy is increasingly important. With modern treatment protocols, 80% of patients can be expected to survive. It has been estimated that up to one in 250 young adults will be a survivor of childhood cancer in the future; infertility, however, may be a consequence. As a wide range of fertility preservation methods are increasingly offered by clinicians, this systematic and comprehensive textbook dealing with the cryobiology, technology and clinical approach to this therapy will be essential reading to infertility specialists, embryologists, oncologists, cryobiologists, ObGyns, andrologists, and urologists with an interest in fertility preservation. Fertility Cryopreservation reviews all the techniques of this increasingly important field within reproductive medicine. It covers the basic principles of pertinent cryobiology, and contains major sections on the different therapies available, written by international specialists combining experience from both academic centers and commercial industries.

Specifically designed as an introduction to the exciting world of engineering, ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING encourages students to become engineers and prepares them with a solid foundation in the fundamental principles and physical laws. The book begins with a discovery of what engineers do as well as an inside look into the various areas of specialization. An explanation on good study habits and what it takes to succeed is included as well as an introduction to design and problem solving, communication, and ethics. Once this foundation is established, the book moves on to the basic physical concepts and laws that students will encounter regularly. The framework of this text teaches students that engineers apply physical and chemical laws and principles as well as mathematics to

design, test, and supervise the production of millions of parts, products, and services that people use every day. By gaining problem solving skills and an understanding of fundamental principles, students are on their way to becoming analytical, detail-oriented, and creative engineers. Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel;

International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

Automotive Air Conditioning and Climate Control Systems Fundación Telefónica Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market This ground-breaking book defines the concept of brand relevance using dozens of case studies-Prius, Whole Foods, Westin, iPad and more- and explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Key points: When managing a new category of product, treat it as if it were a brand; By failing to produce what customers want or losing momentum and visibility, your brand becomes irrelevant; and create barriers to competitors by supporting innovation at every level of the organization. Using dozens of case studies, shows how to create or dominate new categories or subcategories, making competitors irrelevant Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy David Aaker, the author of four brand books, has been called the father of branding This book offers insight for creating and/or owning a new business arena. Instead of being the best, the goal is to be the only brand around-making competitors irrelevant.

World Cars 1978 Haynes Manuals In this profound and playful book, Nassim Nicholas Taleb presents his ideas about life in the form of aphorisms, the world's earliest - and most memorable - literary form. Procrustes was a character from Greek mythology who abducted travellers and invited them to spend the night in a special bed, which they had to fit to perfection. They never did. Those who were too tall had their legs chopped off; those who were too short were stretched. Every aphorism here is about a Procrustean bed of sorts - we humans, facing the limits of our knowledge, the unseen and the unknown, resolve the tension by squeezing life and the world into crisp commoditized ideas, reductive categories, specific vocabularies and pre-packaged narratives. Only by embracing the unexpected - and accepting what we don't know - can we see the world as it really is.
