Adrift for years since her partner's death and her son's estrangement, Lenny Barclay isn't sure what she wants. Her friends despair of cheering her up. Even making her mayor of their idyllic Colorado mountain town doesn't awaken the joyous, passionate Lenny they once knew. But the arrival of the corporate planners from the Wilderness Campaign brings back some of Lenny's fire. They already act like they own the place, including the arrogant Sloane McHenry. Pinedale—and her fractured family—does not need a Fortune 500 fix. Sloane is always hunting for the complete package and she's got it in Pinedale. The mayor is a spineless pushover, the site only holds a dilapidated shop owned by the aforementioned mayor and Sloane has a secret weapon that will prove useful should she meet resistance. This project's not just about profit, either, for reasons she can't explain—not even to herself.

Scholars, journalists, and publishers have turned their brains inside out in the effort to predict what lies ahead, but who better to comment on the future of the book than those who are driven to write them?

The way we absorb information has changed dramatically. Edison ' s phonograph has been reincarnated as the iPod. Celluloid went digital. But books, for the most part, have remained the same--until now. And while music and movies have undergone an almost Darwinian evolution, the literary world now faces a revolution, a sudden change in the way we buy, produce, and read books. In The Late American Novel, Jeff Martin and C. Max Magee gather some of today ' s finest writers to consider the sea change that is upon them. Lauren Groff imagines an array of fantastical futures for writers, from poets with groupies to novelists as vending machines. Rivka Galchen writes about the figurative and literal death of paper. Joe Meno expounds upon the idea of a book as a place set permanently aside for the imagination, regardless of format. These and other original essays by Reif Larsen, Benjamin Kunkel, Victoria Patterson, and many more provide a timely and much-needed commentary on this compelling cultural crossroad.

Darth Vader and Family Coloring Book Career Examination

Ten thousand years ago, our species made a radical shift in its way of life: We became farmers rather than hunter-gatherers. Although this decision propelled us into the modern world, renowned geneticist and anthropologist Spencer Wells demonstrates that such a dramatic change in lifestyle had a downside that we ' re only now beginning to recognize. Growing grain crops ultimately made humans more sedentary and unhealthy and made the planet more crowded. The expanding population and the need to apportion limited resources created hierarchies and inequalities. Freedom of movement was replaced by a pressure to work that is the forebear of the anxiety millions feel today. Spencer Wells offers a hopeful prescription for altering a life to which we were always ill-suited. Pandora ' s Seed is an eye-opening book for anyone fascinated by the past and concerned about the future.

A Vanished World

False charges of racial profiling threaten to obliterate the crime-fighting gains of the last decade, especially in America's inner cities. This is the message of Heather Mac Donald's new book, in which she brings her special brand of tough and honest journalism to the current war against the police. The anti-profiling crusade, she charges, thrives on an ignorance of

policing and a willful blindness to the demographics of crime. In careful reports from New York and other major cities across the country, Ms. Mac Donald investigates the workings of the police, the controversy over racial profiling, and the anti-profiling lobby's harmful effects on black Americans. The reduction in urban crime, one of the nation's signal policy successes of the 1990s, has benefited black communities even more dramatically than white neighborhoods, she shows. By policing inner cities actively after long neglect, cops have allowed business and civil society to flourish there once more. But attacks on police, centering on false charges of police racism and racial profiling, and spearheaded by activists, the press, and even the Justice Department, have slowed the success and threaten to reverse it. Ms. Mac Donald looks at the reality behind the allegations and writes about the black cops you never heard about, the press coverage of policing, and policing strategies across the country. Her iconoclastic findings demolish the prevailing anti-cop orthodoxy.
