Since the publication of earlier editions of this book, China's political and economic landscapes have changed dramatically, with the rise of new leadership, evolving alliances, tariff wars, educational policies and technological advancements. Focusing on Chinese-American ventures, this expanded and revised edition chronicles the investments that have marked China's astonishing growth in the 21st century. Adding another dimension to the exploration of Chinese-American commerce, this edition discusses China's roots in Confucian identity and its effect on modern business culture. Case studies of American businesses that have been successful in China are included. Reflecting upon the changing nature of Chinese consumerism and international corporate behavior, the authors close with specific suggestions for those interested in doing business in China.

A pioneering forecaster predicts the trends and technologies that will shape global culture and commerce in the next two decades—a must-read guide for business leaders, entrepreneurs, and anyone looking for an edge. “ In a world of half-baked hot takes, Marian Salzman is a true seer. ” —Andrew Yang  
A little more than twenty years ago, the Y2K computer glitch threatened to bring the global

economy to its knees. But instead of overnight disruption, humankind slipped into two decades of economic turmoil, ecological angst, and tribalism, all set against the backdrop of a newly global and digital civilization. Sometimes the events that seem pivotal are just blips, while the more meaningful cultural shifts are hiding in plain sight. Marian Salzman's job is to uncover those hidden shifts. So what's in store for the next two decades? In this acutely observed guide, Salzman, whose past predictions have been heralded for coming uncannily close to the way we live now, unpacks the course of human life from the bumpy turn of the millennium through the pandemic era, when chaos and "together apart" are the new normal, equity has become a battle cry, and breathing space emerged as the greatest luxury of all. Drawing inspiration from John Naisbitt's classic 1982 book *Megatrends*, Salzman then turns to the two decades ahead. Navigating deftly among geographies, she connects threads across business, civic life, consumerism, family, and entertainment, revealing the trends and developments—some established, some surprising—poised to recast our past, shape our collective future, and shift our identities. In a world dominated by disruption, being prepared for change is a critical advantage. The *New Megatrends* is gripping reading for anyone seeking to understand the shape and texture of the next era, which, above all, will be marked by its relentless pace, new technology, and the ever-present threats of climate change and political division.

After a major disaster, when investigators are piecing together the story of what happened, a striking fact often emerges: before disaster struck, some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level. But for a variety of reasons, this crucial information did not reach decision-makers. So, the organization moved ever closer to catastrophe, effectively unaware of the possible threat—despite the fact that some of its employees could see it coming. What is the problem with communication about risk in an organization, and why does this problem exist? What stops people in organizations or project teams from freely reporting and discussing critical risks? This book seeks to answer these questions, starting from a deep analysis of 20 disasters where the concealment of risks played a major part. These case studies are drawn from around the world and span a range of industries: civil nuclear power, coal, oil and gas production, hydropower energy, metals and mining, space exploration, transport, finance, retail manufacturing and even the response of governments

---

to wars, famines and epidemics. Together, case studies give an insight into why people hesitate to report risks—and even when they do, why their superiors often prefer to ignore the news. The book reviews existing research on the challenges of voice and silence in organizations. This helps to explain more generally why people dread passing on bad news to others—and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues. The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019-2020. The full picture of the very early stage of the COVID-19 pandemic remains unclear, and further research is obviously needed to better understand what motivated some municipal, provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak.
