The suspension expert's illustrated, comprehensive troubleshooting guide for dirt, street, and supermoto—with a solution to virtually any problem. Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance.

Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and
drama is immeasurable. Published in conjunction with the RT (Radio Telef s ireann) Thomas Davis
Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen
essays by many of the foremost academics studying Beckett today. Literary luminaries such as John
Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to
delve into the psyche of the man responsible for classics such as Murphy, Krapp's Last Tape, and
Waiting for Godot, while actors Barry McGovern and Rosemary Pountney describe what makes his
works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on
literature today.
