With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, The Victory Motorcycle.

'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political

science, international relations theory, sociology, theology, anthropology, and geography. Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A. Rees, Mark S. Cladis, Fabio Petito, Linda Woodhead, Jonathan Fox, Brendan Sweetman, Don Handelmann, Scott W. Consumption stalks Elizabeth James. At least that's what the doctors from Harley street, the best available in Britain if not the world, say it is. One drop of blood at a time. Her only hope is the clean air, good food, and care of her uncle, Dr Standfast. Life on Barnecourt farm, high on a down in Dartmoor, may be her last chance. A chance that strange, almost human, men threaten. Especially when they scratch at her window in the depths of the night. Strange animals, a dog that walks upright and understands English, stalk the brush. Almost as disturbing, a visitor, a young man, almost literally drops from the sky into her life.

This lecture attempts to tell stories through music and about music, and about the music of several cultures and times, about its effect on human experience, about the instruments and their makers in order to try and connect the present time with some of music's own roots, a cause for much reflection on the part of the lecturer.

This book advances our understanding of the nature, grounds and limits of human dignity by connecting it with Kant's notion of an ideal moral community, or "Kingdom of Ends". It features original essays by leading Kant scholars and moral and political philosophers from around the world. Although Kant's influential injunction to treat humanity as an end in itself and never merely as a means has garnered the most attention among those

interested in analyzing human dignity with a Kantian lens, Kant himself places much more emphasis on the Kingdom of Ends as crucial for defining human dignity. The chapters in this collection focus not only on interpretive issues related to the Kingdom of Ends but also on practical applications that have the potential to advance discussions about the nature and foundations of rights, the content of moral principles, the importance of moral ideals and attitudes and the nature of moral motivation. Exploring and connecting the ideas of human dignity and the Kingdom of Ends significantly deepens our moral understanding, advances discussions in moral and political philosophy and enhances our appreciation of Kant's moral theory. Human Dignity and the Kingdom of Ends: Kantian Perspectives and Practical Applications will appeal to scholars and advanced students of Kant, moral philosophy, political philosophy, and political theory.

2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come

without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Despite being one of the most successful motorcycles of all time, the Royal Enfield Bullet has had a very chequered history. Its story begins in the 1930s and by the 1950s it was at the height of its popularity in post-War Britain. Then it became a stalwart of the Indian Army and manufacture transitioned from Britain to India. The near-collapse of the Royal Enfield marque in the 1990s almost meant the end of this classic motorbike, but with the involvement of the Eicher Group from 2001 onwards, the updated Bullet generated new interest and renewed its original commercial success, just like a phoenix rising from the ashes. With over 200 photographs, this book describes the origins of the Royal Enfield company and the pre-war Bullets from 1932 and the relaunch of the Bullet in 1949 with its radical swinging-arm frame. Derivative models such as the 350 and 500, as well as those for competition and road are covered as well as specials such as diesels, V-twins, Egli and big-bore Bullets. The development story behind the lean-burn, electric-start and 5-speed updates is discussed as well as the UCE - the all-new Bullet from 2008 and the Classic and its design story. Finally, the evolution beyond the Bullet is covered which includes the Continental GT and Himalyan 650 twins.
