The ultimate reference for Triumph lovers and fans of British motorcycles, The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today collects all of the motorcycles from this iconic brand in a single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first

motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!

This is the 4th edition of by far the most extensive buyer's guide available for the classic BSA Gold Star, covering the complete range of production from the original 1938 Model M24 through post-WWII models ZB, BB, CB, DB and DBD. Written to make it easy for potential Gold Star buyers to refer to when inspecting one of these highly desirable machines for possible purchase, it includes specialized information and photographs necessary to avoid paying Gold Star prices for the similar-looking B32/B34 and Alloy Clipper "competition models," or purchasing dubious components such as renumbered engines and counterfeit RRT2 gearboxes. The information also will be invaluable for restorers as well as people generally interested in the history of these machines. One chapter is devoted to the 1957 Spitfire Scrambler, a little-known hybrid produced only that year consisting of a twin-cylinder 650 cc engine in Gold Star cycle parts, predating the Rocket Gold Star by five years. Eleven Tables of data contain information on the proper speedometers, tachometers, gearboxes, carburetors, etc., and cover all models, including Clubman, Catalina Scrambler, Road Racer, Dirt Tracker, and Competition

'All Sports'. Fifty-five pages of color advertisements and images from rare sales brochures and magazines contain information for all years of this machine, from a pre-production 1937 description of expected specifications, to a listing in a 1964 sales brochure issued a year after the last Gold Star was manufactured (not covered are the B25/B50 machines that were given the name in 1971-72). For the restorer, a very useful "reverse parts list" specially created for this book has part numbers sorted in numerical order, enabling part numbers to be quickly identified and associated with the corresponding figures in the BSA parts manual. If you think you ever might want to buy, restore, or rebuild a Gold Star, the information in this book can save you considerable time as well as keep you from making some very costly mistakes. CHAPTERS: 1. Who Should Buy This Book?; 2. Mini-History of The Gold Star; 3. U.S. Gold Star Models; 4. Current Selling Prices; 5. Cost of Restoration; 6. Major Features to Check (Brakes; Rims; Forks; Instruments, Headlight Assembly, and Controls; Fuel Tank; Oil Tank; Frame; Exhaust Pipe; Engine; Magneto; Carburetor; Gearbox Types and Markings); 7.
