Welcome to the future, where the norms are vast bio-constructed cities, air toxic enough to force citizens to wear oxygen masks, and crime so severe that the cops drive tanks! When a mysterious winged girl with the power to cleanse the poisoned air is kidnapped by the villainous Buaku, police mini-tank commander Leona Ozaki, her tank Bonaparte, and her lovesick partner Al must confront the arch-criminal and his catgirl molls-the beautiful and deadly Annapuma and Unipuma-before Buaku's master plan kicks into gear. Buaku has more than money on his mind, and the future fate of humanity hangs in the balance! Produced by international comics superstar Shirow Masamune, creator of Appleaseed and Ghost in the Shell, Dominion is an ecological-dystopian-police procedural adventure/comedy as only Shirow can create! This new edition is published for the first time in America in right-to-left reading format, as originally published in Japan. * Shirow is well-known and critically acclaimed internationally. * Produced in the authentic right-to-left reading format, as originally published in Japan.

The mechanical engineering curriculum in most universities includes at least one elective course on the subject of reciprocating piston engines. The majority of these courses today emphasize the application of thermodynamics to engine efficiency, performance, combustion, and emissions. There are several very good textbooks that support education in these aspects of engine development. However, in most companies engaged in engine development there are far more engineers working in the areas of design and mechanical development. University studies should include opportunities that prepare engineers desiring to work in these aspects of engine development as well. My colleagues and I have undertaken the development of a series of graduate courses in engine design and mechanical development. In doing so it becomes quickly apparent that no suitable textbook exists in support of such courses. This book was written in the hopes of beginning to address the need for an engineering-based introductory text in engine design and mechanical development. It is of necessity an overview. Its focus is limited to reciprocating-piston internal-combustion engines – both diesel and spark-ignition engines. Emphasis is specifically on automobile engines, although much of the discussion applies to larger and smaller engines as well. A further intent of this book is to provide a concise reference volume on engine design and mechanical development processes for engineers serving the engine industry. It is intended to provide basic information and most of the chapters include recent references to guide more in-depth study.

"It took us three thousand years to find an intelligent species among the stars and only three months to pick a fight with them." After the United Nations of Terra (UNT) Fleet Frigate Nelson reported an encounter with an alien spaceship, she disappeared without a trace. An alien race called the Maltaani have made their presence known by landing a mass of troops on Balfan-48, a desert planet located far too close to Terra Earth for comfort. Tensions are rising and tempers are growing short. The UNT responds by deploying ISMC's Ninth Division aboard the flagship Atlas to the scene to investigate the Maltaani aggression. Blinded and deafened by enemy jamming, Ninth Division drops on Balfan-48 to counter the alien provocation. When Ninth Division is decimated by a sneak attack, it's up to Second Lieutenant Fortis to lead the surviving Space Marines in a fight for their lives. Trapped in a shrinking perimeter, cut off from Fleet support, and short of everything except the enemy, the Space Marines fight the only way they know how: like hell. After Fortis samples a batch of DINLI brewed from lima bean rations, the radio-telephone operators ask him what message to send to Atlas in case the jamming ends. His response becomes a legend in the ISMC. "Tell them to send fresh fruit and ammo."

Motor trikes have been around since the dawn of motoring, with many starting out as utility vehicles or prototypes of cars. But trikes haven't died out or become mere relics of motoring history – companies all over the world still produce them today, and many will convert a motorcycle into a trike. Trikes are not only huge fun, but can also be a lifestyle choice. They are as diverse as the people who ride them, and this book illustrates the vast range of machines available. The reader will discover a plethora of trike designs and layouts from the late 19th century to the present day. Some influential designs include Piaggio's three wheeled vehicles, the Morgan three wheeler, and the Harley-Davidson Servicar. The book also features the products of companies that convert motorcycles into trikes, and shows some mass-produced examples that you can buy today. Then there are the weird and wonderful machines built by individual enthusiasts – a testament to their engineering skills and true eccentricity ...

A guide to systematic, as opposed to incidental, ad-hoc innovation Innovation need not only be jugaad. For the first time a book shows us how in India, innovation can be introduced in one's

organization in a systematic, deliberate way. 8 Steps to Innovation explains how you can do this by building an idea pipeline in your organization, improving the velocity of ideas coming in, and implementing the ideas within the given constraints. All this is shown through nice, snappy examples, mostly homegrown Indian ones. Few books in the market talk about innovation in the Indian context with Indian examples as this one does.

The best-selling Honda ever, the long-running Honda Mini Trail, was available in a huge range of models, even within each model year. The Honda Mini Trail Enthusiast's Guide covers all Honda Mini Trails and Z50 bikes produced between 1968 and 1999. Author Jeremy Polson begins with a brief introduction of the models that led up to the Mini Trail, and then jumps into a thorough analysis of the many models and iterations that Honda has offered through the years. Despite the worldwide popularity of Honda's best-selling model, no other Mini Trail book had been published, and the accuracy of information found on the Internet is suspect at best. For Z50 collectors and enthusiasts, this book presents facts and figures found nowhere else. In addition to the hard facts regarding each model of each year, this book is filled with many rare photos that track the evolution of the Mini Trail, and unravel its mystery.

When Annie's dad promises her a beach sports car, she imagines a bright red hotrod with racing stripes. All her school friends will be so jealous! But when her gift turns out to be Dad's battered old bomb car instead, Anne realizes it will take a lot of effort to turn it into the automobile of her dreams. Highlighting the power of imagination in making things new again, this entertaining story also shows how hard work can sometimes make the final reward that much sweeter.

"Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other. Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor"--Publisher's description.
