115 Mercury Inline 6 Repair
Mercury's ADI was first used on the in-line 6's 1980-1988 model years. So I guess it's 80's technology, now 33 years

old. [Now changed topic: what engines can run with these old Mercury engines when the old Mercury engines are actually running:] As far as I can tell, the only 2013 115Hp engine that can run with one of these ported piston classic Mercs is the 123HP Optimax 115 ProXS.

115hp Mercury 1987-1997.

We have found these outboards to a very smooth running 2 stroke. We have had no failures on any of these motors we have remanufactured. We found that the few failures with this class of outboards are due to fuel contamination or oil injection failure. As with all Mercury outboards we build we have removed the oil ...

I have a 1985 Mercury Inline 6 cylinder 115 hp, the problem is when I launch the boat and start the engine, when motor is put in gear it shuts off. But, just a bump of the ignition switch it starts right back up. Do you have any ideas or solutions of what the problem could be. Help.....

Mercury-Mariner Outboard Repair Books DOWNLOADS

For instance, the first 115 inline 6 was built in 1970. It was changed somewhat in '73, and after the net

horsepower rating change in the early 80's the 140, which was previously the 150 became the 115 with NO CHANGES between the latest 140 and the newly rated 115. Also, there was an early 140 in '72 ONLY that was different from the late 70's 140.

I have a 1983 Mercury outboard 115 HP inline 6. The manual ...

I have a 1983 Mercury outboard 115 HP inline 6. The manual is not clear on setting the carb float bowl needle valves. It calls for 13/32 from the face of the cover.

When I set it this way it did not look like the drawing in the manual and the engine would not go above a fast idle before it stalled out. The point of measurement isn't clear to me.
