Education Finance in the States, 1984 Chromatographic Analysis of Pharmaceuticals

This volume represents the proceedings of a two-day international meeting on chiral chromatography held at the University of Surrey between 3-4 September 1987. The meeting was jointly organized by the Chromatographic SOciety and the Robens Institute of the University of Surrey in response to the burgeoning interest in this rapid maturing field of chromatography. Nowhere is this interest more evident than in the agrochemical and pharmaceutical industries where the implications of different pharmacological and toxicological activity for the individual enantiomers present in a racemic drug ol" insecticide is an increasing area of concern. Developments in the area of chiral separations are at last beginning to provide SCientists with the necessary tools to study how animals and man handle racemates and relate their obselVations to the obselVed biological effects of these substances. The development of robust and Simple methods for the separation of enantiomers will therefore have a profound Impact on safety evaluation and drug design. The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan Edwards.

Violence Across the Lifespan presents students with scholarly articles and chapters that take a multidisciplinary approach to understanding family violence across

the lifespan. The anthology is organized into six units. The opening unit introduces key theories from the fields of criminology, psychology, and sociology used in understanding violence. Later units progress through the lifespan, beginning with examining interpersonal violence and children, moving to interpersonal violence and adolescents, adults, and finally, older adults. The readings address all forms of interpersonal family violence including emotional abuse, physical abuse, sexual abuse, and neglect. They also covers abuse that occurs in educational settings such as bullying and sexual assault. Finally, issues of financial exploitation and self-neglect occurring in older adulthood are covered. The collection concludes with strategies for collaborating within multidisciplinary teams to increase effectiveness and for developing effective self-care strategies to prevent secondary traumatic stress. Violence Across the Lifespan is an ideal resource for courses in criminology, psychology, counseling, and social work that prepare students to support or interact with individuals who have endured acts of violence.

Stressing the variations in meaning of modernity and tradition, this work shows how in India traditional structures and norms have been adapted or transformed to serve the needs of a modernizing society. The persistence of traditional features within modernity, it suggests, answers a need of the human condition. Three areas of Indian life are analyzed: social stratification, charismatic leadership, and law. The authors question whether objective historical conditions, such as advanced industrialization, urbanization, or literacy, are requisites for political modernization.

Among the ancient Near Eastern peoples, the Hebrews uniquely contributed to man's knowledge and understanding of the cosmos. Since their attitude towards the external world reveals the profound conviction that nature plays an integral role in the drama of religious history, the physical universe was hardly a neutral world between Yahweh and Israel. Through their awareness of Yahweh's dealings with his people and of cosmic realities the ancient Hebrews gradually came to discover the attributes of God. They realized, even in the world of nature around them, the broad outline of the plan to which their own destiny was to conform. Hence, the study of their world view is less an inquiry into an intangible cosmic concept than an analysis which discloses their insights into the realities of the physical universe. In order to appreciate the Hebrews' unique world view we shall investigate the creation narratives against the wider background of the ancient Near Eastern literature. We shall journey into all the levels of the universe: the heavens

with their luminaries and the meteorological phenomena; the earth with its topographical features; the geophysical phenomena which challenge the very stability of the universe; the waters welling up as springs, or furrowing the earth's surface as rivers, or dotting it as seas, lakes and swamps; the division of the earth into four segments, known as the cardinal points, where the different countries are located; the relation of all these segments to the navel of the earth; finally, the underworld in which are located the subterranean ocean, the foundations of the mountains, and the realm of the dead.
