12 1 Species Interactions Answer

Answer Key To Species Interactions

Answer — This can lead into a discussion of the effect of resource availability on interaction strength. The outcome of

species-species interactions can be affected by the availability of resources, such as sunlight, water or nutrients (Diamond and Case, 1986). Also, you could discuss the mechanisms of species interactions, other possible ...

Species Interactions Quiz - ProProfs Quiz  
Created Date: 4/4/2016 3:05:43 PM

Interspecific competition, in ecology, is a form of competition in which individuals of different species compete for the same resources in an ecosystem (e.g. food or living space). Intraspecific competition is an interaction in population ecology, whereby members of the same species compete for limited resources.
