automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Chilton's BMW 3-series 2006-10 Repair Manual Diandra Kreatif
Designed by Douglas Aviation engineer Ed Heinemann, the A-20 Havoc and its variants served in the U.S. Army Air Force and those of several allies. The plane was configured for attack, night fighter, and bomber roles, and nearly 7,500 were built from 1939 through 1944. The first order for the Havoc came from the French, who extensively tested the prototype aircraft after the USAAF failed to place an order. The French insisted on modifications that included new 1000 hp Pratt & Whitney engines (later upgraded to 1100 hp) and a narrower fuselage. The improved A-20's speed and handling compared favorably to a fighter aircraft. Little wonder it became one of the most extensively-built light bombers of WWII. Originally printed by the U.S. Army Air Force and Douglas, this handbook provides a fascinating glimpse inside the cockpit of this warbird. Originally classified *Restricted*, the manual was declassified and is here reprinted

The M3 is based on the prosaic 3 Series family sedan and has 'redefined' the term 'sports saloon'. There were several iterations of the M3 including two EVO versions and a convertible, but BMW shocked the world with the release of the E36 M3 in 1993. It had a new engine with a maximum speed electronically limited to 155mph. Not only was the new M3 quick but the international media was full of praise for the Germany hotrod. Everybody who was anybody simply had to be seen in one. In 2000, BMW released the E46 M3 which was a much more refined car to drive. The E46 M3 was a simply brilliant package that had absolutely no peers unless you considered the true exotics. It was a genuine sales success all over the world.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
