After arriving in North America in the late 1960s, the sport was embraced by enthusiasts and developed into an American phenomenon. By the early 1980s riders from the USA were dominating the sport's natural-terrain circuits, and the uniquely-American spinoff discipline of Supercross was packing NFL stadiums nationwide. In 2005, the Motorcycle Hall of Fame Museum created an exhibit, Motocross America, which celebrates the history of American motocross. Motocross America is a lavishly illustrated book that features the bikes and memorabilia from the museum display and text by Bill Amick. The Motocross America exhibit is open to the public at the Motorcycle Hall of Fame Museum in Pickerington, Ohio, through 2006.

American politics are about to shift to the Left in a major way. This may sound absurd after the US has been shifting to the Right now for nearly half a century. But recent demographic data shows that the Right is reaching a limit, especially among younger generations. This same data also shows that this current long shift to the Right has lasted twice as long as any previous shift of its kind in the past 200 years. In other words, it's an anomaly, one that is long overdue for a big reversal. Also, such reversals usually take the public and experts by surprise, even though they're based on solid transformations, almost always on major economic downturns happening every half a century or so. And since these reversals happen with regularity, they are also foreseeable, at least if one looks for the right underlying trends. In the meantime, Americans seem to be taking up positions, digging in; more and more willing to take on the new challenges with newer ideas and convictions. The question is when will this big change happen, and how far will it go. Read this timely study with lucid forecasts based on polls, demographics, and well researched long-term economic trends. A must for anyone interested in disentangling the present, and anticipating the future.
