Honda Service Manual, 87-90, 92-93
VT1100C Shadow Haynes Manuals N.

America, Incorporated
257 pages and more than 500 illustrations
and charts, size 8.25 x 10.75 inches. This
workshop manual is a compilation of 12
original Honda publications. It includes a
reproduction of the original 100cc-125cc
factory workshop manual plus the 11
factory supplements that extend the
coverage of that original manual through
1984. The original 'base' manual for this
series of motorcycles was first published in
1970 in softbound format. In 1971 it was
changed to a ring-bound publication, as this
better suited the addition of supplements
for model updates without the need for
printing an entirely new manual. The 1970
softbound manual covered the CB100,

CL100 and SL100 and in 1971 that softbound publication was updated and reprinted to include the CB125S, CD125S and the SL125. A little later, but still in 1971, the first ring-bound version was issued which now included a supplement for the TL125. However, by the end of 1976 all of those models, with the exception of the CB125, had been discontinued, but the base ring-bound manual continued to be updated through 1984 for the CB125 models. For some inexplicable reason, even though 1985 was the final year for the CB125, instead of publishing yet another update, Honda issued a singular manual specific to the 1985 model only. This 257 page manual covers the 1970 to 1984 single cylinder street, scrambler, motosport and trials models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering, models covered are: 100cc Street-CB100 100cc Scrambler-CL100 100cc Motosport-SL100 125cc Street-CB125-CB125S-CB125J-CD125S 125cc Motosport-SL125 125cc Trials-TL125

Many of the earlier Honda motorcycle models were often introduced at different times in different countries using different model names or designations. For example the CB125 was first introduced in 1971 but was not available in the USA (as the CB125S) until 1973. These varying release dates and differing model designations often lead to difficulty in selecting the correct workshop manual. Worse yet, owners of this series of 100cc and 125cc singles are subjected to considerable confusion surrounding the appropriate selection from the multitude of OEM publications that have recently flooded the on-line marketplace. Honda published 11 different supplements and addendums to the original ring-bound base manual and many of these are listed as workshop manuals by individuals that deliberately intend to deceive or really have no idea what they are selling. In addition, many of the so-called workshop manual reprints are incomplete. Consequently, should you decide to purchase your manual elsewhere, you are advised to confirm that it includes all 257 pages of the original factory manual. Owners of the 1959-1966 twin cylinder

125-150cc 'Benly' C92 & C95 series are directed to our Honda factory workshop manual ISBN 9781588500823, owners of the 1964-1980 twin cylinder 125-150cc models will require our workshop manual ISBN 9781588502643. Finally, please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them. Honda Service Manual 88-89, 91-92 VT600C Shadow VLX. Haynes Manuals N. America, Incorporated Each Haynes manual provides specific and detailed instructions for performing everything from basic

maintenance and troubleshooting to a complete overhaul of the machine, in this case the Honda CBR600RR, model years 2007 through 2012. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Honda VT1100 Shadow V-twins Owners Workshop Manual Haynes Manuals N. America, Incorporated
104 pages, 50 illustrations, size 5.5 x 8.5 inches. A faithful reproduction of the John Thorpe BOOK OF THE HONDA a fully illustrated repair and maintenance manual that covers the 50cc models C100, C102, Monkey Bike, CE105H Trails Bike, C110 & C114. The 125cc models C92, CB92 & Benley. The 250cc models C72 & CB72. The 305cc models C77, CB77. Originally published in 1967 by Floyd Clymer this illustrated manual contains repair and maintenance data for both Kick and Electric Start models including Electrical and Ignition Equipment, Wiring Diagrams, Clutch, Carburetion, Transmission, Forks, Engine, Brakes and more. It also includes information on routine service, maintenance and tune ups plus technical specification charts. While not as exhaustive as a factory manual there is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete mechanical renovation. An essential addition to any Honda Motor Cycle Enthusiast's library, this book has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. This is a - must have - reference for this series of Honda motorcycles

and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.
