In today's managed mental health care environment, clinical hypnosis has become popular as a tool for alleviating symptoms promptly. This book is about using ideomotor (IM) signals in the rapid hypnoanalysis of psychosomatic disorders. The technique of rapid hypnoanalysis addresses the whole brain and places the feeling back into brief therapy without removing the logic or the efficiency. It offers a refreshing alternative that allows therapists to go deeper while being even briefer. Part I covers basic concepts and principles. The value, principles, and treatment planning of hypnoanalysis are discussed, including special intake questions and how to set up ideomotor signals. Part II covers basic applications of rapid hypnoanalysis and illustrates their employment. The seven common causes of psychosomatic disorders, ideomotor applications to Direct Suggestion in Hypnosis (DSIH), hypnotic preparation and care of the surgical patient, self-hypnosis, and treating the cognitive and emotional components of persistent pain are examined. Part III presents clinical transcripts of cases to illustrate the actual uses of the technique with psychosomatic patients. These transcripts explore the technique with a complex smoking cessation patient, a simple smoking recall session, a one-visit cure of a hypersensitive scar, and a workshop demonstration session with an asthma patient. This is a "how-to" book that provides numerous case examples and illustrations showing specifically how ideomotor analysis techniques are used. "This book underscores what we have long known—Gurganus stands among the best writers of our time." —Ann Patchett Through memorable language and bawdy humor, Gurganus returns to his mythological Falls, North Carolina, home of Widow. This first work in a decade offers three novellas mirroring today's face-lifted South, a zone revolutionized around freer sexuality, looser family ties, and superior telecommunications, yet it celebrates those locals who have chosen to stay local. In doing so, Local Souls uncovers certain old habits—adultery, incest, obsession—still very much alive in our New South, a "Winesburg, Ohio" with high-speed Internet. Wells Tower says of Gurganus, "No living writer knows more about how humans matter to each other." Such ties of love produce hilarious, if wrenching, complications: "Fear Not" gives us a banker's daughter seeking the child she was forced to surrender when barely fifteen, only to find an adult rescuer she might have invented. In "Saints Have Mothers," a beloved high school valedictorian disappears during a trip to Africa, granting her ambitious mother a postponed fame that turns against her. And in a dramatic "Decoy," the doctor-patient friendship between two married men breaks toward desire just as a biblical flood shatters their neighborhood and rearranges their fates. Gurganus finds fresh pathos in ancient tensions: between marriage and Eros, parenthood and personal fulfillment. He writes about erotic hunger and social embarrassment with Twain's knife-edged glee. By loving Falls, Gurganus dramatizes the passing of Hawthorne's small-town nation into those Twitter-nourished lives we now expect and relish. Four decades ago, John Cheever pronounced Allan Gurganus "the most technically gifted and morally responsive writer of his generation." Local Souls confirms Cheever's prescient faith. It deepens the luster of Gurganus's reputation for compassion and laughter. His black comedy leaves us with lasting affection for his characters and the aching aftermath of human consequences. Here is a universal work about a village.

Mit der zunehmenden Elektrifizierung von Antriebssträngen aktueller Fahrzeuggenerationen entsteht Forschungs- und Entwicklungsbedarf zur weiteren Optimierung der Antriebe. Zu den meist verbauten Antrieben zählen dabei die permanenten Synchronmaschinen, deren Optimierung Forschungsschwerpunkt zahlreicher aktueller Arbeiten ist. Die innerhalb der Maschinenentwicklung notwendigen umfassenden Bewertungsprozesse werden aber oft nur nachrangig betrachtet. Schwerpunkt dieser Arbeit ist die elektromagnetische Bewertung von permanenten Synchronmaschinen, integriert in den

Maschinenentwicklungsprozess. Ziel ist es, bereits im frühen Entwicklungsstadium eine umfassende, recheneffiziente und genaue Maschinenbewertung vornehmen zu können. Schnittstellen zu aufbauenden thermischen und strukturdynamischen Bewertungsprozessen sind implementiert, sodass sich im Bewertungsprozess eine konsistente Datenbasis ergibt. Ergebnisse bleiben rückverfolgbar. Der in dieser Arbeit beschriebene Bewertungsprozess beinhaltet die Bestandteile der Simulation auf Basis der Finite-Elemente-Methode, Auswertungs- und Automatisierungsprozesse und den Abgleich der Bewertungsergebnisse mit Prüfstandsmessungen, sodass sich der elektromagnetische Bewertungsprozess final als automatisierter, standardisierter und validierter Prozess ergibt. Mit dem Ziel einer recheneffizienten und robusten Bewertung basieren die FE-Berechnungen auf stationären 2D-Simulationen unter Berücksichtigung des segmentweise geschichteten Rotors. Zentrale Ergebnisse der Simulation sind die sich einstellenden Flussverkettungen. Die Steuerung der Simulationspunkte und die Modellierung der Flussverkettungskennfelder im gesamten Betriebsbereich stellen einen Schwerpunkt der Prozessautomatisierung dar. Methoden zur Bewertung des Betriebsverhaltens, im Maschinenleerlauf, unter Maximallast, im Fahrzyklus und im Fehlerfall aktiver Kurzschluss werden hergeleitet. Die Integration von Messwerten in den Bewertungsprozess ermöglicht die Prozessvalidierung. Darüber hinaus werden die Messwerte genutzt, um unbekannte Simulationsparameter zu identifizieren und zu korrigieren.

This book provides an overview of Animal-Assisted Activities (AAA) and Animal-Assisted Therapy (AAT) and demonstrates how they can be incorporated into solution-focused treatment programs. Pichot, focusing on the use of therapy dogs, starts with a discussion of the basics of AAA/T and solution-focused therapy, as well as what every practitioner should know about dogs before partnering with them. Successfully combining all of this into an effective treatment program is considered next. Pichot draws upon her own experience developing an AAA/T program in the substance abuse counseling program at a county public health agency to illustrate the effective implementation of such a program and the struggles and lessons learned in doing so. Using AAA/T with special populations, cultural considerations, and the impact a therapy dog can have on the handler. New in this edition are client scenarios that demonstrate the therapist's thought process when making clinical decisions about when and how to use a therapy dog. Sample forms and treatment plans are also provided that professionals can use to modify or structure in their work with clients. The concepts and information provided in this valuable guide will be helpful for any therapist regardless of whether he or she is in private practice or working in an agency setting.

[Lemon-Aid New Cars and Trucks 2013](#) Charles C Thomas Publisher 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

The Book of Five Rings (Annotated) Haynes Publications

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

This new edited book presents a "partnership" model and aims to be cutting edge, scholarly, and unambiguously useful and practical. Kia J. Bentley and the other well-known and respected contributors address the need for approachable, immediately useful discipline specific content on the most important social work practice roles in mental health. The book articulates how roles often associated with working with a specific population (e.g. those who abuse substances, persons with severe mental illness, distressed marital couples) are quite relevant and useful in a much wider range of populations.

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.
