When it comes to the climate, we don't need more marketing or anxiety. We need established facts and a plan for collective action. The climate is the fundamental issue of our time, and now we face a critical decision. Whether to be optimistic or fatalistic, whether to profess skepticism or to take action. Yet it seems we can barely agree on what is really going on, let alone what needs to be done. We urgently need facts, not opinions.

Insights, not statistics. And a shift from thinking about climate change as a "me" problem to a "we" problem. The Carbon Almanac is a once-in-a-lifetime collaboration between hundreds of writers, researchers, thinkers, and illustrators that focuses on what we know, what has come before, and what might happen next. Drawing on over 1,000 data points, the book uses cartoons, quotes, illustrations, tables, histories, and articles to lay out carbon's impact on our food system, ocean acidity, agriculture, energy, biodiversity, extreme weather events, the economy, human health, and best and worst-case scenarios. Visually engaging and built to share, The Carbon Almanac is the definitive source for facts and the basis for a global movement to fight climate change. This isn't what the oil companies, marketers, activists, or politicians want you to believe. This is what's really happening, right now. Our planet is in trouble, and no one concerned group, corporation, country, or hemisphere can address this on its own. Self-interest only increases the problem. We are in this together. And it's not too late for

concerted, collective action for change.

In my first book on Electric Cars, I covered those which were available in the US. In my new book, I decided to cover the world. I also venture into Electric Planes and EVTOLS - Electric Vertical Takeoff and Landing machines. Even though EVs are very interesting, you might get bored after the 100th or so. To relieve your boredom, I inserted stories about my visits from a couple of outer space aliens who are very interested in Electric Cars. Who says you can't mix research books with sci-fi and humor? I start with the most popular EVs. I cover many parts of the globe. And I cover lesser known Electric cars. Some places around the world don't have good roads or the roads are too crowded. There, electric motorcycles, rickshaws, and other vehicles are more popular than electric cars. And did you know that there's an electric skateboard? Electric Cars come in several models - Sedans, SUVs, Crossovers, Hatchbacks, etc. There are even little electric bubble cars. And there's a Amphibious E-Tricycle Camper. Now is a good time to get into an EV - there's availability. You'll get good range. And you'll save money on gas and maintenance. Besides, bans on ICE vehicles (internal combustion engine - petrol powered cars) are coming. Maybe not tomorrow, but soon. And supermost of all, owning an EV is cool and the wave of the future. And you want to get into the action now

because you want to ride the crest of the wave. Some people are still worried about - what happens if the battery dies. I cover that. Good news - not a problem. I also cover converting your car to an EV (or rather hiring someone to do that for you) and EV Rentals. I conclude the book with what it would take to own an EV Dealership, My EV choices, and statements by World Leaders on EVs. I evaluate the more popular cars and provide a blank evaluation form so you can make your own evaluations. This book is packed with information, but I keep it light so you won't get bored. Actually, that's not true. I kept it light so that I wouldn't get bored.

This book covers the introduction, theory, development, and applications of hybrid and electric vehicles and their charging infrastructures. It also discusses the real applications of power converters and electric drives to give the readers a flavour of how to design propulsion drives and fast charging systems for electric vehicles. It further covers important topics such as static and dynamic wireless charging systems, battery management, and battery swapping systems for electric vehicles. This book: Presents comprehensively different types of electric vehicles and their powertrain architecture. Highlights modern optimization techniques such as genetic algorithms, simulated annealing, particle swarm optimization, and ant colony optimization. Discusses different charging methods such as wired and wireless for a variety of batteries including lead acid,

An expanded edition of the classic exploration of the English esoteric musical underground—with the first biography of Coil, Current 93, and Nurse With Wound. This newly expanded edition of England's Hidden Reverse, the classic exploration of the English esoteric musical underground that includes the first, and only, biographies of Coil, Current 93, and Nurse With Wound, is based on exclusive interviews and unprecedented access to all three bands' personal archives. Together, these genre-defying bands and their circles represent the English underground in all its cultural, artistic, and sexual variety. Over four decades, the three intertwined groups have maintained a symbiotic, yet uneasy, relationship with the mainstream of popular culture, even as their music, beliefs, and practices have repelled them from it. Theirs was a clandestine scene whose work accents the many occulted peculiarities of Englishness that flow through generations of outsiders, channeling personalities as diverse as Aleister Crowley, Arthur Machen, Joe Orton, Shirley Collins, Björk, and Marc Almond. The story of this Hidden Reverse has, necessarily, remained a secret. Until now. This new volume contains almost 100 pages of extra

material culled from *Furfur*, a collection of interviews with musicians and artists whose careers intersected with the bands', initially published alongside *Strange Attractor's* first limited edition of the book.

*Collision Reconstruction Methodologies - Volume 7B* -The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction.

---

Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include:

- Night Vision Study and Photogrammetry
- Vehicle Event Data Recorders
- Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction

The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.
