A quarter of a century ago, the Land Rover Discovery defined at a stroke how traditional 4 x 4 all-terrain ability could co-exist with family-estate practicality at an affordable price.

Since 1989, the Discovery has gone through several iterations, but its essential qualities have remained unchanged.

Practical, capable, and above all completely distinctive - the stepped roof seemed odd at first but now defines the Discovery shape - the Discovery has gone on to become one of Land Rover's

an icon across the world, famed for its classic design, its practicality and its longevity. In this revised edition of his acclaimed book, first issued as *Land Rover - 60 Years of the 4 x 4 Workhouse*, James Taylor charts sixty-five years of Land Rover development in comprehensive detail, bringing the story right up to date with the latest Defender variants. Contents include: Prototypes and development vehicles; Standard production models; The special editions; Land Rovers built outside the UK; Special conversions; Military variants; The Land Rovers that

never were. The first book to look at the story of the Land Rover's gradual evolution. Comprehensively researched, extensively illustrated and accessibly presented, this will be an indispensable read for all those who have an interest in the legend that is Land Rover. Superbly illustrated with 476 colour photographs. James Taylor's major specialization is the Rover company and its descendants, and he is widely acknowledged as the pre-eminent historian of the Land Rover. The Autocar Plunkett Research, Ltd.

The reed goes on, the reed comes off. The reed rots and returns to the earth. The houses we work on outlast us. The thatch we use has never stood still. On *The Roof* is a thatcher's tale - a journey of discovery, and a reflection on what it means for a person or a building to belong in a place. It tells Tom Allan's story, leaving an office job in the city to find fulfilment among the Devon roofs, as well as the stories of six other people who share his trade. We meet the Hebridean son of a lobster fisherman who thatches with a dune-growing grass, a Syrian refugee who found peace among the seagrass roofs of a

Danish island, and one of the first thatch, and the plants they use to women to become master of Japan's 5,000-year-old craft of thatching. Thatching is an ancient, living tradition. To be a thatcher is to belong to a craft almost endless in its reach - at once one of the oldest ways of giving shelter, a way of working close to the land, and a deep immersion in the rhythms of a place on the most local scale possible: a village, a valley, an island. But the craft isn't frozen in time. Thatched roofs exist in a constant state of repair, renewal and alteration, and the trade is poised at a moment of profound change both in the way people

thatch with. As Allan reveals, the story of thatching is the story of our relationship with the land, and how we have chosen to treat it.

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of

Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80

---

of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore — to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished — with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

The car - once everybody's

dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly.

Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and

---

opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert, featuring case studies from major car brands including Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo. It includes findings from 100 interviews conducted with CEOs, marketing managers, sales managers and sales people, from manufacturer level to small rural dealers, as well as industry experts, policy makers, free-standing repair shops and professional organizations. Auto

Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. It is the first book to specifically address how to deal with the challenges facing the automotive industry and illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build

even more successful brands in the future.

The enthusiasm for adult 'colouring-in' has resulted in numerous titles being published over recent months, covering subjects such as flowers, animals and decorative patterns, with links to mindfulness and art therapies.

The one area that hasn't been targeted is the more structured and mechanical approach, which would appeal to the male market.

The Haynes classic cutaways fit the bill perfectly, and the variety of cars included in the owners' colouring manual have wide appeal across all ages. Cutaway Colouring contains over 180 cutaways, along with a brief history about the classic Haynes Manual.
