Consumption stalks Elizabeth James. At least that's what the doctors from Harley street, the best available in Britain if not the world, say it is. One drop of blood at a time. Her only hope is the clean air, good food, and care of her uncle, Dr Standfast. Life on Barnecourt farm, high on a down in Dartmoor, may be her last chance. A chance that strange, almost human, men threaten. Especially when they scratch at her window in the depths of the night. Strange animals, a dog that walks upright and understands English, stalk the brush. Almost as disturbing, a visitor, a young man, almost literally drops from the sky into her life.

The DARPA Robotics Challenge was a robotics competition that took place in Pomona, California USA in June 2015. The competition was the culmination of 33 months of demanding work by 23 teams and required humanoid robots to perform challenging locomotion and manipulation

tasks in a mock disaster site. The challenge was conceived as a response to the Japanese Fukushima nuclear disaster of March 2011. The Fukushima disaster was seen as an ideal candidate for robotic intervention since the risk of exposure to radiation prevented human responders from accessing the site. This volume, edited by Matthew Spenko, Stephen Buerger, and Karl Iagnemma, includes commentary by the organizers, overall analysis of the results, and documentation of the technical efforts of 15 competing teams. The book provides an important record of the successes and failures involved in the DARPA Robotics Challenge and provides guidance for future needs to be addressed by policy makers, funding agencies, and the robotics research community. Many of the papers in this volume were initially published in a series of special issues of the Journal of Field Robotics. We have proudly collected versions of those papers in this STAR volume.

This book advances our understanding of the nature, grounds and limits of human dignity by connecting it with Kant's notion of an ideal moral community, or "Kingdom of Ends". It features original essays by leading Kant scholars and moral and political philosophers from around the world. Although Kant's influential injunction to treat humanity as an end in itself and never merely as a means has garnered the most attention among those interested in analyzing human dignity with a Kantian lens, Kant himself places much more emphasis on the Kingdom of Ends as crucial for defining human dignity. The chapters in this collection focus not only on interpretive issues related to the Kingdom of Ends but also on practical applications that have the potential to advance discussions about the nature and foundations of rights, the content of moral principles, the importance of moral ideals and attitudes and the nature of moral motivation. Exploring and connecting the ideas of human dignity and the Kingdom of Ends significantly deepens our moral understanding, advances discussions in moral and political philosophy and enhances our appreciation of Kant's moral theory. Human Dignity and the Kingdom of Ends: Kantian Perspectives and Practical Applications will appeal to scholars and advanced students of Kant, moral philosophy, political philosophy, and political theory.

Amexica is the harrowing story of the extraordinary terror unfolding along the U.S.-Mexico border—"a country in its own right, which belongs to both the United States and Mexico, yet neither"—as the narco-war escalates to a fever pitch there. In 2009, after reporting from the border for many years, Ed Vulliamy traveled the frontier from the Pacific coast to the Gulf of Mexico, from Tijuana to Matamoros, a journey through a kaleidoscopic

landscape of corruption and all-out civil war, but also of beauty and joy and resilience. He describes in revelatory detail how the narco gangs work; the smuggling of people, weapons, and drugs back and forth across the border; middle-class flight from Mexico and an American celebrity culture that is feeding the violence; the interrelated economies of drugs and the maquiladora factories; the ruthless, systematic murder of young women in Ciudad Juarez. Heroes, villains, and victims—the brave and rogue police, priests, women, and journalists fighting the violence; the gangs and their freelance killers; the dead and the devastated—all come to life in this singular book. Amexica takes us far beyond today's headlines. It is a street-level portrait, by turns horrific and sublime, of a place and people in a time of war as much as of the war itself.

At the turn of the 20th Century, Japanese 'villages' and their exotic occupants delighted and mystified visitors to the Great Exhibitions and Worlds' Fairs . At the beginning of the 21st Century, Japanese tourists have reversed the gaze and now may visit a range of European 'countries', as well as several other cultural worlds, without ever leaving the shores of Japan. This book suggests that these and other exciting Asian theme parks pose a challenge to Western notions of leisure, education, and entertainment. Is this a case of reverse orientalism? Or is it simply a commercial follow-up on the success of Tokyo Disneyland? Is it an appropriation by one rich nation of a whole world of cultural delights from the countries that have influenced its twentieth-century success? Can the parks be seen as political statements about the heritage on which Japan now draws so freely? Or are they new forms of ethnographic museum? Examining Japanese parks in the context of a variety of historical examples of cultural display in Europe, the U.S. and Australia, as well as other Asian examples, the author calls into question the too easy adoption of postmodern theory as an ethnocentrically Western

phenomenon and clearly shows that Japan has given theme parks an entirely new mode of interpretation.

The Nature of the Machine Routledge

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students.
