Suppose You Wake Up to Find There's No Electricity, No Information Grid, and There's No End in Sight. Will You Survive? If You're Worried About How You and Your Family Will Survive in a Natural Disaster, Terrorist Attack, or Economic Collapse.... You MUST Not Wait One More Day to Read The One Year Prepper Plan: A Monthly Survival Guide for Long-Term Planning. Every day you turn on the news to hear about hurricanes, wildfires, terrorist attacks, disease, and wars. There's nothing worse than the panic that comes from facing a disaster with no supplies, no plan, and no survival skills. The idea of preparing for a short emergency or a long-term crisis is intimidating because...it's overwhelming to consider the huge number of supplies you need....it's expensive to gather the necessary equipment....you don't know where you'll put a large stock of food and equipment in your small home....no one else you know is

doing it. ...you don't even know where to start. Would you like to have a simple plan to help you prepare for a disaster before it happens and finally be able to sleep soundly at night knowing that your family will have what it needs and be safe? I hope so, because if you wait to start preparing after disaster strikes it will be too late! How Is the One Year Prepper Plan Different? Many survival guides expect you to put everything together, but they don't spell out exactly what you need to do and how to do it in small steps. With the One Year Prepper Plan, you'll get a step by step plan for survival preparation. If you follow everything in the guide to the letter, you'll have most of what you need for a short crisis or a long-term survival situation. You'll get specific instructions about what to purchase or collect, how much of it to store, and how to store it. With the One Year Prepper Plan, you can tailor your timeline to suit your needs. With the One Year Prepper Plan, you're going to learn to change your mindset from one of panic and procrastination to one of strategy and preparation. Be Ready for Any Situation that Comes Your Way TTT The latest concerns about global disaster come not from bombs that physically destroy property, but from Electromagnetic Pulse weapons, or EMPs, that can knock out the electrical and information grid permanently. But that's not the only thing you need to prepare for. In the One Year Prepper Plan, you'll:

- Learn how to determine what's the most likely disaster to occur in your area!
- Discover how you can create a shelter in place during a chemical accident or attack!
- Get educated about how you can handle a period of long-term economic crisis or unemployment!
- Get the knowledge you need to create disaster plans and drills for your family!
- Find out what disasters might be lurking in your home and what you need to do reverse any problems!
- Calculate what your family needs to survive for a period of 3 days to a year without electricity, gas, or running water!
- Get a step-by-step plan to prepare rather than trying to do everything at once!
- Learn the benefits of learning to garden and preserve your own food!
- Discover how to protect you and your family members from a disease epidemic!
- Get information on how to secure your home and keep it protected when the grid goes down!
- Find out which skills you need to develop to improve your chances of survival!

You Have a Choice to Make Today... Do you continue turning a blind eye to the possibility of chaos and disaster – hoping that nothing happens or that if it does the government will save you? Or do you finally start taking steps to prepare so that you're not dependent on anyone else to meet your needs or those of your family? I think it's an easy choice.

The Unofficial Hunger Games Wilderness Survival Guide Lonely Planet Kids

Ninja master and survival expert Hakim Isler presents modern day survival strategies based on the techniques of Japan's ancient ninja. If you find yourself in an unexpected extreme situation—while wilderness camping, hiking or adventuring off the beaten path—a fundamental understanding of your surroundings can make the difference between life and death. By harnessing the powers of nature, the ninja built a legendary reputation as survivalists with an ability to thrive in even the most inhospitable situations. By studying their ancient philosophy and techniques, alongside modern science, you can prepare yourself to survive in any outdoor environment. The basis for ninja survival skills comes from the Buddhist philosophy of the five elements: Earth, Water, Fire, Wind and the Void. By understanding how the elements relate to the human body, the formula for survival becomes clear. Earth – protection from the harsh elements using trees, leaves, dirt, grass, and vines to build shelter Water – effectively cool off when overheated and avoid dehydration Fire – properly use fire to warm the body and to purify water by boiling it Wind – harness the power of wind to ventilate shelters, smoke meat and help build fires Void – apply knowledge and creativity while developing a survival plan Isler has over 20 years of experience as a martial artist, Special Forces soldier and security expert. With over 135 full-color photos and 60 illustrations detailing these time-tested methods, this book offers insights that are extremely practical. The foreword by Ninjutsu master Stephen K. Hayes masterfully connects the past to the present by providing unique and valuable insights for surviving mentally in the outdoors.
