Sheridan House, Inc.

Built as both a fighter-interceptor and fighter-
bomber, the F-86 Sabre (sometimes called
the Sabrejet) was one of the most widely-
produced fighters of the Cold War. In
December of 1950, three squadrons of
Sabres were rushed into combat in Korea,
where they dueled North Korean, Chinese
and Russian pilots flying the MiG-15. By the
time the war was over, F-86 pilots achieved a
stunning victory ratio - destroying nearly 800
enemy aircraft with a loss of only 76 Sabres.
The nimble jet also saw combat in the Taiwan
Straight Crisis and the Indo-Pakistan Wars of
1965 and 1971. Originally printed by North
American and the U.S. Air Force, this F-86
Flight Operating Manual taught pilots
everything they needed to know before
entering the cockpit. Classified "Restricted,"
the manual was recently declassified and is
here reprinted in book form. This facsimile has
been reformatted and color images appear in
black and white. Care has been taken to
preserve the integrity of the text.
