This atlas seeks to shed light on the opportunities and challenges related to mapping and analysing fishing activity

using AIS (ship-tracking) data. It reviews AIS-related data in the context of global and regional fisheries knowledge, and shares insights into the strengths and limitations of the data and current processing methodology.

Trends and Applications in Information Systems and Technologies

Ember Classroom Assessment and Educational Measurement explores the ways in which the theory and practice of both educational measurement and the assessment of student

learning in classroom settings mutually inform one another. Chapters by assessment and measurement experts consider the nature of classroom assessment information, from student achievement to affective and socio-emotional attributes; how teachers interpret and work with assessment results; and emerging issues in assessment such as digital technologies and diversity/inclusion. This book uniquely considers the

limitations of applying large-scale educational measurement theory to classroom assessment and the adaptations necessary to make this transfer useful. Researchers, graduate students, industry professionals, and policymakers will come away with an essential understanding of how the classroom assessment context is essential to broadening contemporary educational measurement perspectives.

Urban Drainage Routledge

This report presents the

conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge, skills and well-being. Like previous cycles, the 2018 assessment covered reading, mathematics and science, with the major focus this cycle on reading literacy, plus an evaluation of students' global competence – their ability to understand and appreciate the perspectives and world views of others. Financial literacy was also offered as an optional

assessment.

Critical Environmental Areas
American Society for Microbiology Press
Urban Drainage has been thoroughly revised and updated to reflect changes in the practice and priorities of urban drainage. New and expanded coverage includes: Sewer flooding The impact of climate change Flooding models The move towards sustainability Providing a descriptive overview of the issues involved as well as the engineering principles and analysis, it draws on real-world examples as well as models to support and demonstrate the key issues facing engineers

dealing with drainage issues. It also deals with both the design of new drainage systems and the analysis and upgrading of existing infrastructure. This is a unique and essential textbook for students of water, environmental, and public health engineering as well as a valuable resource for practising engineers.

Cuba Betrayed, first

published in 1962, is an

autobiographical work of

former Cuban dictator

Fulgencio Batista, in which

he expresses his viewpoint regarding his two terms as dictator, his defeat, and his successors—Cuba’s “Betrayers.” “The book is not meant to be a literary masterpiece. Still less has there been any attempt at stylistic elegance. It is, rather, an exposition of facts, a narration based on memory and notes.”—Introduction **Atlas of Medieval Europe** Cambridge University Press With this handbook, the distinguished team of editors has combined the expertise of leading nanomaterials

scientists to provide the latest overview of this field. They cover the whole spectrum of nanomaterials, ranging from theory, synthesis, properties, characterization to application, including such new developments as quantum dots, nanoparticles, nanoporous materials, nanowires, nanotubes, and nanostructured polymers. The result is recommended reading for everybody working in nanoscience: Newcomers to the field can acquaint themselves with this exciting subject, while specialists will find answers to all their questions as well as

helpful suggestions for further research.

There has been an enormous upward redistribution of income in the United States in the last four decades. In his most recent book, Baker shows that this upward redistribution was not the result of globalization and the natural workings of the market. Rather, it was the result of conscious policies that were designed to put downward pressure on the wages of ordinary workers while protecting and enhancing the incomes of those at the top. Baker explains how rules on trade, patents, copyrights,

corporate governance, and macroeconomic policy were rigged to make income flow upward.

Covering the period from the fall of the Roman Empire

through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: * geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes * each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context * as a body, the maps provide a vivid representation of the development of nations, peoples and social structures.

With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

This encyclopedic work on Islam comprises English translations of all canonical *hadiths*, complete with their respective chains of transmission (*isnads*). By conflating the variant versions of the same *hadith*, the repetitiveness of its literature has been kept wherever possible to a

minimum. The latest methods of *isnad* analysis, described in the general introduction, have been employed in an attempt to identify the person(s) responsible for each *hadith*. The book is organized in the alphabetical order of those persons. These are the so-called 'common links'. Each of them is listed with the tradition(s) for the wording of which he can be held accountable, or with which he can at least be associated.

Written specifically to help lawyers and non-lawyers brush up on franchise law, this respected publication - now in

its fourth edition - is charged with useful definitions, practical tips, and expert advice from experienced franchise law practitioners. This practical guide examines franchise law from a wide-range of experiences and viewpoints. Each chapter is written by two experienced practitioners to provide a well-rounded guide to the fundamentals of franchise law and key issues in the practice, including trademark law; structuring the franchise relationship; disclosure issues; registration; franchise relationship laws; antitrust law; counseling franchisees; and

more.

The Economist Taylor & Francis This book is composed of a selection of articles from The 2021 World Conference on Information Systems and Technologies (WorldCIST'21), held online between 30 and 31 of March and 1 and 2 of April 2021 at Hangra de Heroismo, Terceira Island, Azores, Portugal. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern information systems and technologies research, together with their technological development and applications. The main topics

covered are: A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; N) Technologies for Biomedical

Applications.
