165,321 corks 1 boat Most people have childhood dreams; few ever pursue them. At the age of 34, John Pollack quit a prestigious speechwriting job on Capitol Hill to pursue an idea he had harbored since the age of six: to build a boat out of wine corks and take it on an epic journey. In *Cork Boat*, Pollack tells the charming and uplifting story of this unlikely adventure. Overcoming one obstacle after another, he convinces skeptical bartenders to save corks, corrals a brilliant but disorganized partner, and cajoles more than a hundred volunteers to help build the boat, many until their fingers bleed. Hired as a speechwriter for President Clinton midway through construction, Pollack soon has the White House saving corks, too. Ultimately, he and

his crew set sail down the Douro River in Portugal, where the boat becomes a national sensation. Written with unusual grace and disarming humor, *Cork Boat* is a buoyant tale of camaraderie, determination, and the power of imagination.

ACT Math Prep Book 2020 and 2021 Springer Nature

This book discusses and analyses global policies and practices aimed at promoting equity in higher education participation and attainment. Although the massification of higher education systems has facilitated the participation of students from deprived backgrounds, socioeconomic inequalities persist in access to the most prestigious institutions and programmes. Privileged students benefit from a number of advantages

in the competition for selective and scarce places: access to information, lower aversion to debt, higher expectations, better previous schooling and higher academic achievement. The chapters present a critical analysis of equity policies in different countries with or without affirmative action policies, within a context of neoliberal policies or within a social democratic model and the reasons why they have failed to promote equity and fairness, preventing students from achieving their full educational potential.
