Federal Register JHU Press

One hopes, as a new generation of electric vehicles becomes a reality, The Electric Vehicle offers a long-overdue reassessment of the place of this technology in the history of street transportation.

Municipal Journal, Public Works Engineer and Contractors' Guide e-artnow sro

An entire volume dedicated to detailing and preserving the iconic muscle car dealerships of the 1960s and early 1970s, many whose doors are now closed. Text is supported with more than 350 historic photos and illustrations. Muscle car historian Duncan Brown revisits this glorious automotive era when Nickey 427 Camaros and supercharged Dodge Demons by Grand Spaulding Dodge terrorized the streets. Drag sponsored cars from Reynolds Buick, Yeakel Chrysler-Plymouth, and Mel Burns Ford informed buyers that if you came to their dealership, you too could have a screaming fast muscle car just like the ones you saw at the dragstrip. It was these dealerships that created the lasting muscle car legacy through their innovative

advertising and over-the-top performance. The majority of these dealerships floundered, unable to re-attract the customers they had prior to the muscle car. Thankfully, a volume has been dedicated to preserving the history of those less fortunate and revisiting the past success of these Lost Muscle Car Dealerships.

EPA Reports Bibliography McFarland Vols. for 1919- include an Annual statistical issue (title varies).

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Automotive Industries Springer This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The

important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

Census of Motor Vehicles, 31st December, 1962: Bulletin Routledge
The New York Times Almanac 2002 is the almanac of record.

Drawing on the resources of the world's premier news organization, it provides readers with a wealth of data about the United States and the world in a readable and more easily accessible form than other almanacs. Un-rivaled in scope and unsurpassed in comprehensiveness. The New York Times Almanac pays careful attention to significant issues, topics, and developments of the day and sets them in historical context. It gives the stories and the stories behind the stories. The New York Times Almanac is the first choice for students, journalists, and researchers—for anyone who needs timely, accurate information about the United States and other nations around the globe. The New York Times Almanac 2002 includes: The first results of the 2000 Census; Comprehensive coverage of all the states and every nation in the world; World Series results and the most comprehensive sports section of any almanac; Notable obituaries from the worlds of politics, entertainment, and science; More information about the Internet, the

worldwide AIDS epidemic, and world population than any other almanac; The most complete coverage of environmental issues, the economy, and the workings of the federal government; All major Academy Award winners since 1928 and the names of all Nobel Laureates and why they won and much, much more.

Automobile Emission Control, the Technical Status and Outlook as of December 1974

This contributed volume collects insights from industry professionals, policy makers and researchers on new and profitable business models in the field of electric vehicles (EV) for the mass market. This book includes approaches that address the optimization of total cost of ownership. Moreover, it presents alternative models of ownership, financing and leasing. The editors present state-of-the-art insights from international experts, including real-world case studies. The volume has been edited in the framework of the International Energy Agency's Implementing Agreement for Cooperation on Hybrid and Electric Vehicles (IA-HEV). The target audience primarily comprises practitioners and decision makers but the book may also be beneficial for research experts and graduate students.
