There isn't another place in the world that can match Detroit's automotive history. For nearly a century, what was conceived, designed, produced, and marketed from this town ruled the roads. So it only stands to reason that the Motor City is likely to host some of the country's greatest collector garages. From the personal home of the man who put America on wheels to the posh residences of current automotive icons such as Bob Lutz, Motor City Dream Garages takes readers on a guided tour of 20-plus of Motown's most interesting garages. Going beyond even these fantastic garagemahals, this book also takes readers inside select company garages for exclusive looks at the unique and important collections amassed by companies such as General Motors and Roush Industries (parent company to Roush Racing, owned by Jack Roush). If you like both garages and the beautiful machines within, this book is for you!

An entire volume dedicated to detailing and preserving the iconic muscle car dealerships of the 1960s and early 1970s, many whose doors are now closed. Text is supported with more than 350 historic photos and illustrations. Muscle car historian Duncan Brown revisits this glorious automotive era when Nickey 427 Camaros and supercharged Dodge Demons by Grand Spaulding Dodge terrorized the streets. Drag sponsored cars from Reynolds Buick, Yeakel Chrysler-Plymouth, and Mel Burns Ford informed buyers that if you came to their dealership, you too could have a screaming fast muscle car just like the ones you saw at the dragstrip. It was these dealerships that created the lasting muscle car legacy through their innovative advertising and over-the-top performance. The majority of these dealerships floundered, unable to re-attract the customers they had prior to the muscle car. Thankfully, a volume has been dedicated to preserving the history of those less fortunate and revisiting the past success of these Lost Muscle Car Dealerships.

This illustrated history chronicles electric and hybrid cars from the late 19th century to today ' s fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars ' research and development. The important marketing shift from a " woman ' s car " to " going green " is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

[The Early Laps of Stock Car Racing](#)

The first organized, sanctioned American stock car race took place in 1908 on a road course around Briarcliff, New York—staged by one of America ' s early speed mavens, William K. Vanderbilt, Jr. A veteran of the early Ormond – Daytona Beach speed trials, Vanderbilt brought the Grand Prize races to Savannah, Georgia, the same year. What began as a rich man ' s sport eventually became the working man ' s sport, finding a home in the South with the infusion of moonshiners and their souped-up cars. Based in large part on statements of drivers, car owners and others garnered from archived newspaper articles, this history details the development of stock car racing into a megasport, chronicling each season through 1974. It examines the National Association for Stock Car Automobile Racing ' s 1948 incorporation documents and how they differ from the agreements adopted at NASCAR ' s organization meeting two months earlier. The meeting ' s participants soon realized that their sport was actually owned by William H.G. " Bill " France, and its consequential growth turned his family into billionaires. The book traces the transition from dirt to asphalt to superspeedways, the painfully slow advance of safety measures and the shadowy economics of the sport.

Winner of the 2021 Midland Authors Book Award in History In a time of great inequality and a gutted middle class, the dramatic story of " the strike heard around the world " is a testament to what workers can gain when they stand up for their rights. The tumultuous Flint sit-down strike of 1936-1937 was the birth of the United Auto Workers, which set the standard for wages in every industry. Midnight in Vehicle City tells the gripping story of how workers defeated General Motors,

the largest industrial corporation in the world. Their victory ushered in the golden age of the American middle class and created a new kind of America, one in which every worker had a right to a share of the company ' s wealth. The causes for which the strikers sat down—collective bargaining, secure retirement, better wages—enjoyed a half century of success. But now, the middle class is disappearing and economic inequality is at its highest since before the New Deal. Journalist and historian Edward McClelland brings the action-packed events of the strike back to life—through the voices of those who lived it. In vivid play-by-plays, McClelland narrates the dramatic scenes including of the takeovers of GM plants; violent showdowns between picketers and the police; Michigan governor Frank Murphy ' s activation of the National Guard; the actions of the militaristic Women ' s Emergency Brigade who carried billy clubs and vowed to protect strikers from police; and tense negotiations between labor leader John L. Lewis, GM chairman Alfred P. Sloan, and labor secretary Frances Perkins. The epic tale of the strike and its lasting legacy shows why the middle class is one of the greatest inventions of the 20th century and will guide our understanding of what we will lose if we don ' t revive it.
