### Criminological Theory Routledge

Crime is recognized as a constant factor within human society, but in the twenty-first century organized crime is emerging as one of the distinctive security threats of the new world order. The more complex, organized and interconnected society becomes, its crime becomes too. This book recognizes that the new century will be defined in part by a struggle between an 'upperworld', defined by increasingly open economic systems and democratic politics, and a transnational, entrepreneurial, dynamic and richly varied underworld, willing and able to use and distort these trends for its own ends. In order to understand this challenge, this book gathers together experts from a variety of fields to understand how organized crime is changing. From the Sicilian Mafia and the Japanese Yakuza, to the new challenges of Russian and East European gangs and the 'virtual mafias' of the cybercriminals, this book offers a clear and concise introduction to many of the key players moving in this global criminal underworld. This book is a special issue of Global Crime

### Refocusing Crime Prevention Routledge

To honour the extraordinary contribution of Professor Anthony Edward Bottoms to criminology and criminal justice, leading criminologists and penal scholars have been asked to contribute original essays on the wide range of areas in which he has written. The book starts by reflecting on the depth and breadth of Anthony's contribution and his melding of perspectives from moral philosophy, social theory, empirical social science research, and criminal justice. This is no ordinary collection, because it also contains a major essay by Anthony Bottoms, on Criminology and 'positive morality', reflecting on social order and social norms. In similar vein, Jonathan Jacobs approaches criminology from a moral philosophical viewpoint, whilst Ian Loader and Richard Sparks ponder social theory and contemporary criminology. Topically, Peter Neyroud reflects on evidence-based practice and the process of trying to do experiments in relation to policing. In the second section of the book on Crime, Justice, and Communities, Loraine Gelsthorpe reminds us that justice is about people, in considering the treatment of women in community justice. Joanna Shapland draws parallels between the process of desistance from crime and the potential role of restorative justice in affecting offenders' journeys. P.-O. Wikstrom reflects on the social ecology of crime, whilst Antje Du Bois Pedain considers the theoretical and practical challenges of sentencing constructively. Finally, the book turns to Anthony Bottoms' major interest in punishment and penal order.

David Garland puts penal populism under the microscope, whilst Alison Liebling explores the empirical evidence for theories of penal legitimacy. Mike Nellis looks back at the use of the creative arts in prisons in Scotland's Barlinnie Unit, whilst Justice Tankebe explores police legitimacy.

**Routledge Library Editions: Social & Cultural Geography** Taylor & Francis Criminology and Democratic Politics brings together a range of international leading experts to consider the relationship between criminology and democratic politics. How does criminology relate to democratic politics? What has been the impact of criminology on crime and justice? How can we make sense of the uses, non-uses, and abuses of criminology? Such questions are far from new, but in recent times they have moved to the centre of debate in criminology in different parts of the world. The chapters in Criminology and Democratic Politics aim to contribute to this global debate. Chapters cover a range of themes such as punishment, knowledge, and penal politics; crime, fear, and the media; democratic politics and the uses of criminological knowledge; and the public role of criminology. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, and politics and all those interested in how criminology relates to democratic politics in modern times.

### **Criminology and Democratic Politics** John Wiley & Sons

This volume focuses on the complex relation between offending and the transition from school to the workplace: how employment and education are related to breaking the law and getting in contact with the criminal justice system. The

contributors report results from several large scale and sophisticated studies conducted in the Netherlands that gathered rich data on employment, education and criminal behaviour. Each of the studies focuses on a particular period during the life course and particular risk categories. Taken together, they contribute to our understanding of how getting out of school, getting into a job and doing illegal things are intertwined over the life-course, and how these relations differ with age and gender. The background of this volume is our interest in the often-studied relation between offending and employment, or more generally, between offending and the transition from school to work, including dropping out, part-time work and joblessness. The available literature casts little doubt that employment and education are indeed related to less crime and offending. However, this relation is much more complex than it appears at first hand. The volume is primarily aimed at researchers and students in the fields of criminology, sociology and economics. However, it may also be of use for non-academic professionals, in particular policy makers and practitioners in the field of criminal justice, probation/rehabilitation, and youth/schools.

*Women, Crime, and the Criminal Justice System* John Wiley & Sons  
Offering a rich introduction to how scholars analyze crime, *Criminological Theory: Context and Consequences* moves readers beyond a commonsense knowledge of crime to a deeper understanding of the importance of theory in shaping crime control policies. The Eighth Edition of this clear, accessible, and thoroughly revised text covers traditional and contemporary theory within a larger sociological and historical context. The latest edition includes new sources that assess the empirical status of the major theories, a new chapter on Black Criminology, and expanded coverage of important perspectives, such as the explanation of white-collar crime and the relationship of immigration and crime.

**Crime, Shame and Reintegration** Jones & Bartlett Learning

Known for its engaging and accessible writing style, this probing text covers the traditional areas of criminology, but also addresses questions of popular concern and policy debate, using systematic evidence to explore such topics as deterrence and incapacitation; race and social class; the rights of the accused; and domestic violence. Challenging readers to think about even the most obvious and commonsense ideas in terms of the evidence that might support or contradict it, the text delves even deeper, encouraging them to see the connection between abstract theoretical propositions and the reality they see everyday in their own lives and in the media. Using a highly perceptive, lively, and "absorbing" writing style to make serious ideas and evidence easily understandable to a wide range of readers, the book integrates interesting boxes throughout to bring experientially distant ideas closer and make concepts more relevant: "On Campus Boxes" highlight crime and other topical issues as they relate to campus life, and "Crime in the News Boxes" take items from newspapers to illustrate ideas and provide models for discussing current cases and issues. Reviewer Richard Wright from the University of Scranton says the text "...offers insightful typologies of crime--presenting a superb comparison of the interactionist; a cultural and structural

explanation of homicide; a first rate discussion of felony murder; and exemplary sections on bookmaking and loansharks." Features new to this edition include an increased number of graphs and tables to help readers get a better grasp of quantitative data; chapter key terms, chapter outlines and a thorough end-of-book glossary for better understanding; and lucid discussions on Hirschi and Gottfredson's self-control theory, community policing, and date rape. For sociologist and criminologists.

During the 1960s, traditional thinking about crime and its punishment, deviance and its control, came under radical attack. The discipline of criminology split into feuding factions, and various schools of thought emerged, each with quite different ideas about the nature of the crime problem and its solutions. These differences often took political form, with conservative, liberal, and radical supporters, and the resulting controversies continue to reverberate throughout the fields of criminology and sociology, as well as related areas such as social work, social policy, psychiatry, and law. Stanley Cohen has been at the center of these debates in Britain and the United States. This volume is a selection of his essays, written over the past fifteen years, which contribute to and comment upon the major theoretical conflicts in criminology during this period. Though associated with the "new" or radical criminology, Cohen has always been the first to point out its limitations particularly in translating its theoretical claims into real world applications. His essays cover a wide range of topics-political crime, the nature of individual responsibility, the implications of new theories for social work practice, models of crime used in the Third World, banditry and rebellion, and the decentralization of social control. Also included is a previously unpublished paper on how radical social movements such as feminism deal with criminal law. Many criminology textbooks present particular theories or research findings. This book uniquely

reviews the main debates of the last two decades about just what the role and scope of the subject should be.
