### Handbook SAGE

This book documents the enduring involvement of children in the commercial sex trade in twentieth-century England. The authors argue that child prostitution needs to be understood within a broader context of child abuse, and provide evidence that indicates the circumstances which have led young people into prostitution over the last hundred years amount, at worst, to physical or psychological abuse or neglect, and at best as the result of limited choice.

Sexual Violence on Trial  
Taylor & Francis

Sexual Violence on Trial provides a contemporary critical examination of the investigation, prosecution and cultural contexts of sexual violence. It draws on Northern Ireland as a case study, while also drawing on experiences from other jurisdictions across the United Kingdom and island of Ireland. Public and academic debates concerning the high-profile

' Belfast/ Rugby Rape Trial ' and the subsequent Gillen review of the arrangements to deliver justice in serious sexual offence cases have been mirrored at a global level with movements such as #MeToo and #TimesUp. This book brings together the perspectives of practitioners and academics to discuss contemporary challenges surrounding the societal and legal framing of sexual violence. It examines key aspects of the criminal justice process including the challenges of supporting victims; of responding to a range of forms of sexual violence such as rape, peer

abuse, intimate partner violence and forced-to-penetrate cases; as well as alternative perspectives and future reforms. It also considers broader debates including balancing the interests of victims and defendants; the impact of cultural myths and stereotypes; the challenges of the digital age; models of consent; legal representation for victims and anonymity and publicity surrounding trials. Written by leading authorities in the field, *Sexual Violence on Trial* will be of great interest to students and scholars of Criminology, Law and Sociology.

Task Force Report

Routledge

Writings on Media gathers more than twenty of Stuart Hall's media analyses, from scholarly essays such as

“ Encoding and Decoding in the Television

Discourse ” (1973) to other writings addressed to wider publics. Hall explores the

practices of news photography, the

development of media and cultural studies, the changing

role of television, and how the nation imagines itself

through popular media. He attends to Britain's imperial

history and the politics of race and cultural identity as

well as the media's relationship to the political

project of the state.

Testifying to the range and agility of Hall's critical and pedagogic engagement with

contemporary media culture—and also to his

collaborative mode of

working—this volume reaffirms his stature as an innovative media theorist while demonstrating the continuing relevance of his methods of analysis.

Parliamentary Debates, House of Representatives, Weekly Hansard Duke University Press

This volume focuses on the complex relation between offending and the transition from school to the

workplace: how employment and education are related to breaking the law and getting

in contact with the criminal justice system. The

contributors report results from several large scale and sophisticated studies

conducted in the Netherlands that gathered rich data on employment,

education and criminal behaviour. Each of the

studies focuses on a particular period during the

life course and particular risk categories. Taken together,

they contribute to our understanding of how getting

out of school, getting into a job and doing illegal things

are intertwined over the life-course, and how these

relations differ with age and gender. The background of

this volume is our interest in the often-studied relation

between offending and

employment, or more generally, between offending and the transition from school to work, including dropping out, part-time work and joblessness. The

available literature casts little doubt that employment and education are indeed related to less crime and offending.

However, this relation is much more complex than it appears at first hand. The volume is primarily aimed at

researchers and students in the fields of criminology, sociology and economics.

However, it may also be of use for non-academic

professionals, in particular policy makers and

practitioners in the field of criminal justice,

probation/rehabilitation, and youth/schools.

This book is a study of the response that the police take to modern urban riots. It takes a principally police perspective on the lead-up to a riot, the police response, and the evaluation of the police response. The book is based on the development and analysis of four extensive case study riots: France 2005, London 2011, Ferguson 2014, and Baltimore 2015. The methodological approach to the case studies is comparative and includes an interactive framework that incorporates a number of key variables. These variables examine how each riot began, how they developed, the response strategies and tactics used by the police, and how the riots eventually ended. The first section looks at defining riots and examines the riot literature and research to date. The second section analyses the current police response to rioting. The third and final section includes an analysis and comparison of the case study riots, along with an examination of how the police response to riots could be improved. With its focus on police practices, this unique volume will be useful for researchers, students, police, law enforcement, and policy makers.
