The purpose of this book is to examine the performance of Guyana's economy during the era of dirigisme and the period of economic liberalisation with emphasis on a market economy, using all available micro-and macro-data. In a much broader and meaningful sense, this book deals with the socio-economic progress of Guyana from the 1960s, with heavy emphasis on the market reforms, because this is the dominant and interesting story for policy lessons in the Third World. This book also focuses on what has happened to poverty, inequality, and other social indicators during the reform period. Until now, there has not been any systematic examination of the effects of the economic reforms in Guyana on unemployment, wages and industrial activity; poverty and inequality; farmers' response to price liberalisation; education and health indicators; ethnicity and growth; and governance, crime and corruption. These issues and more are the subject matter of this book. The book refers to those aspects of Guyana's history and recent political events that bear directly on economic policy and the performance of the economic system.

Higher Education - Reflections From the Field - Volume 1 Frontiers Media SA COVID wrought havoc on the world 's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'The Perspectives of Higher Education ', 'COVID as a Catalyst for Change ', 'Embracing Online Learning as a Response to COVID ', and 'Post Covid: The Way Forward '. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of

higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

This book examines childhood in four Caribbean SIDS (Barbados, Jamaica, Haiti and St. Lucia). Through the analysis of primary and secondary data, the author reveals that children in Caribbean SIDS experience an endangered childhood. The intrinsic characteristics of SIDS, including susceptibility to climate change, and high levels of poverty, indebtedness and inequality, Henry-Lee argues, increase the vulnerability of children. Furthermore, duty bearers are not adequately investing in children, private and public spaces are not child-friendly, and children 's rights are violated daily. Endangered and Transformative Childhood in Caribbean Small Island Developing States shows that children are therefore at risk of being left behind in the fulfilment of the UN2030 Agenda and that the Convention of the Rights of the Child (1989) lacks enforceable sanctions. Unless a radical transformation of childhood takes place, the prosperity and viability of Caribbean SIDS will remain elusive for generations to come. Students, scholars and policy-makers with an interest in childhood studies, children 's rights, and social policy will find this book a valuable read.
