Robert Winston answers 100 big questions from kids across the world in this fun and unique science book. In this unique science book, Professor Robert Winston answers more than 100 real-life questions from children all around the world! And who could be a better scientist to ask questions to than Professor Robert Winston? Ask a Scientist puts the fun back into science in this thrilling book for children aged 6-9. All the popular science topics are covered, with weird and wacky questions and clear and lively answers, including biology: "Why do freckles come in dots on your face?"; physics: "Could you jump off the world?"; Earth: "Why is the sky blue?"; chemistry: "Why are there bubbles in boiling water?"; natural science: "Do dogs cry?", and space: "Why will the Sun explode and make us extinct?". This exciting new edition includes eight pages of additional questions relating to the recent hot topics in science, including the COVID-19 pandemic. Inside the pages of this quirky science book, you'll find: - Every aspect of science: including biology; space; physics; chemistry; Earth; natural sciences. - The topic of science presented in a fresh, exciting way, by tackling it from the child's perspective. - More than 100 real-life questions from children from all around the world about every aspect of science. - Updated reissue of the 2019 edition with an additional eight new pages, including coverage of important recent topics such as the COVID-19 pandemic. The inspiration behind this unique science book came from the many questions posed by Robert Winston's grandchildren and by children from the schools he has visited over the years. The book includes some of these questions, plus many more gathered from countries all over the world – including the UK, Ireland and mainland Europe, Canada, the USA, India, China, and Japan. The 100 big questions featured inside the book cover all the main science topics: chemistry, physics, biology, Earth, space, and natural science.

This book serves as a preparation tool for excellent results for students at the CSEC level.

Pathology Exam Review Nelson Thornes
The purpose of this book is to examine the performance of Guyana's economy during the era of dirigisme and the period of economic liberalisation with emphasis on a market economy, using all available micro-and macro-data. In a much broader and meaningful sense, this book deals with the socio-economic progress of Guyana from the 1960s, with heavy emphasis on the market reforms, because this is the dominant and interesting story for policy lessons in the Third World. This book also focuses on what has happened to poverty, inequality, and other social indicators during the reform period. Until now, there has not been any systematic examination of the effects of the economic reforms in Guyana on unemployment, wages and industrial activity; poverty and inequality; farmers' response to price liberalisation; education and health indicators; ethnicity and growth; and governance, crime and corruption. These issues and more are the subject matter of this book. The book refers to those aspects of Guyana's history and recent political events that bear directly on economic policy and the performance of the economic system.

Disability and

Inequality: Socioeconomic Imperatives and Public Policy in Jamaica explores the lived experiences of persons with disabilities (PWDs) in Jamaica, examining measurable socioeconomic deficits that establish PWDs are more likely to experience inferior education, training, and labor market outcomes compared to persons without disabilities. The author provides an evidence-based, theoretically grounded, and implementable public policy framework, called Framework of Key Determinants for Political and Socioeconomic Inclusion of PWDs, which advances anti-discrimination legislation and a twin-track policy schema with interconnected enablers of human rights. Using this framework, Jamaica, the Caribbean, and other Southern countries looking for methods and strategies to fulfill commitments set out by the United Nations' Convention on the Rights of Persons with Disabilities will find approaches to sustain existing progress, and address structural systemic deficits which continue to deny PWDs long-term sustainable development.

Idiopathic pulmonary fibrosis (IPF) affects 13–20 people per 100,000 population worldwide. In the United States, approximately 100,000 people have IPF with 30,000–40,000 new cases diagnosed annually. Diagnosis remains a challenge with a significant lag between symptoms onset and diagnosis. Delayed diagnosis and treatment can carry high

morbidity and mortality. This book provides concise, easy-to-read, and up-to-date information as it relates to clinical presentation, diagnosis, and treatment of IPF. Despite, adequate treatment, the disease progresses, and a lung transplant is necessary in some cases. This book also discusses the role of lung transplants for IPF and its complications. It is a useful resource for primary care physicians, allied health professionals, hospitalists, and pulmonary physicians who take care of patients with IPF.

Staff Appraisal Report Nova Publishers

This book examines childhood in four Caribbean SIDS (Barbados, Jamaica, Haiti and St. Lucia). Through the analysis of primary and secondary data, the author reveals that children in Caribbean SIDS experience an endangered childhood. The intrinsic characteristics of SIDS, including susceptibility to climate change, and high levels of poverty, indebtedness and inequality, Henry-Lee argues, increase the vulnerability of children. Furthermore, duty bearers are not adequately investing in children, private and public spaces are not child-friendly, and children's rights are violated daily. Endangered and Transformative Childhood in Caribbean Small Island Developing States shows that children are therefore at risk of being left behind in the fulfilment of the UN2030 Agenda and that the Convention of the Rights of the Child (1989) lacks enforceable sanctions. Unless a radical transformation of childhood takes place, the prosperity and viability of Caribbean SIDS will remain elusive for generations to come. Students, scholars and policy-makers with an interest in childhood studies, children's rights, and social policy will find this book a valuable read.

CXC Basic Mathematics EduGorilla Community Pvt. Ltd.

Oxford Mathematics for the Caribbean has been updated to cater for the needs of the classroom in the 21st century. Features of each book in the series include: prior learning points; fully differentiated exercises to cater for a wide range of ability; activities and investigations to encourage mathematical thinking; summaries of the main points of each unit with questions to check understanding, so that students can test themselves; and regular revision exercises to help monitor progress. The series is intended for secondary school pupils studying for the Caribbean Examinations Council (CXC) examinations in mathematics.

Heinemann Office Procedures for CXC
Heinemann

Solid waste has become a major consequence of development and modernization, yet some of the greatest challenges to its management are felt most keenly in the developing countries. This is part of the larger paradox of development; namely, that factors that create the most intransigent problems currently facing the developing countries are invariably those which derive from development itself. Introduction This volume presents a collection of papers which, with perspectives from Africa and the Caribbean, raise critical issues in the management of solid waste. It is intended to offer a basis for discussion among the wide range of disciplines and sectors involved in solid waste management and suggest directions for future work both in the theoretical and practical dimensions of the challenge with which developing countries are confronted.

Classic Papers in Natural Resource Economics brings together a choice selection of some of the most enduring academic writing published in this field in a single volume. The fourteen papers included in this book are grouped into five sections: the intertemporal problem; externalities and market failure; property rights; institutions and public choice; the economics of exhaustible resources; and the economics of renewable resources. Each section represents a major area in natural resource economics. Written by distinguished resource economists, the papers in this volume probe, analyze and illuminate the central issues of the discipline.
