Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. American law reports annotated

In February 2003, American astronauts Donald Pettit and Kenneth Bowersox and Russian flight engineer Nikolai Budarin were on a routine fourteen-week mission maintaining the International Space Station. But then the space shuttle Columbia exploded far beneath them. With the launch program suspended indefinitely, these astronauts had suddenly lost their ride back to earth. Out of Orbit chronicles the efforts of the beleaguered mission controls in Houston and Moscow as they worked frantically against the clock, ultimately settling on a plan that felt, at best, like a long shot. Latched to the side of the space station was a Russian-built Soyuz TMA-1 capsule, the rocket equivalent of a 1976 Gremlin. Despite the inherent danger, the Soyuz became the only hope to return Bowersox, Budarin, and Pettit home. Their harrowing journey back to earth is a powerful reminder that space travel remains an incredibly dangerous pursuit.
