The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

From the creation of fast food, to the design of cities, to the character of our landscape, the automobile has shaped nearly every aspect of modern American life. In fact, the U.S. motor vehicle industry is the largest manufacturing industry in the world. James Rubenstein documents the story of the automotive industry . . . which despite its power, is an industry constantly struggling to redefine itself and assure its success. Making and Selling Cars: Innovation and Change in the U.S. Automotive Industry shows how this industry made adjustments and fostered innovations in both production and marketing in order to remain a viable force throughout the twentieth-century. Rubenstein builds his study of the American auto industry with care, taking the reader through this quintessentially modern history of production and consumption. Avoiding jargon while never over simplifying, Rubenstein gives a detailed and straightforward account of both the production and merchandising of cars. We learn how the industry began and about its methods for building cars and the modern American marketplace. Along the way there were many missteps and challenges—the Edsel, the fuel crisis, and the ascendancy of Japanese cars in the 1980s. The industry met these types of problems with new techniques and approaches. To demonstrate this, Rubenstein gives the reader examples of how the auto industry used to work, which he alternates with chapters showing how the industry has reinvented itself. Making and Selling Cars explains why the U.S. automotive industry has been and remains a vigorous shaper of the American economy.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don ' t perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
